

How to add and use the School Updates Android Mobile App

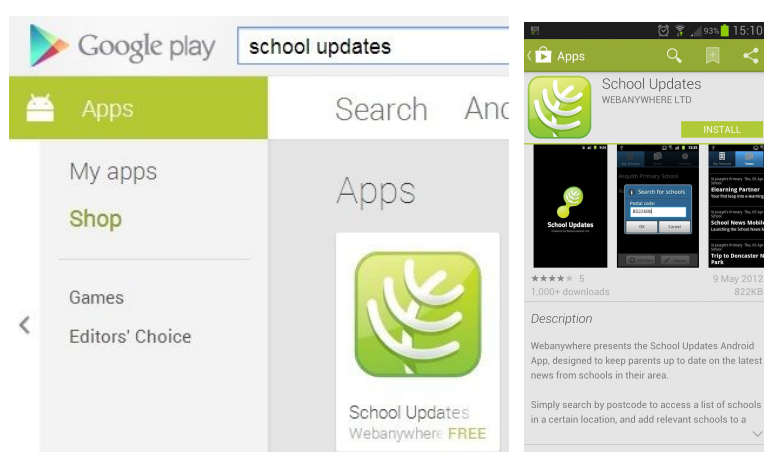

This help sheet explains how to install the School Jotter app on an appropriate device, and connect it to your Jotter website so users can receive news updates on their mobile.

You need to have an Android Device and know how to install an App.

1. Search the Google Play website for the Webanywhere School Updates App and install it.

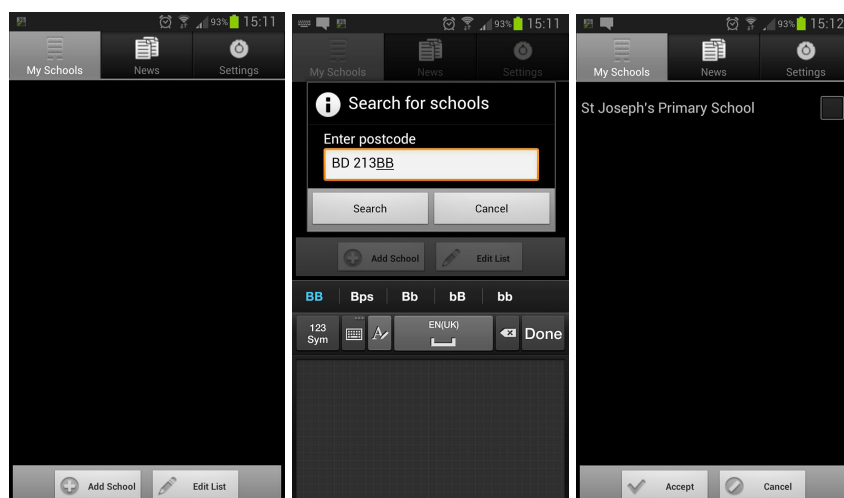

For your convenience here is the link:

<https://play.google.com/store/apps/details?id=com.app.schools>

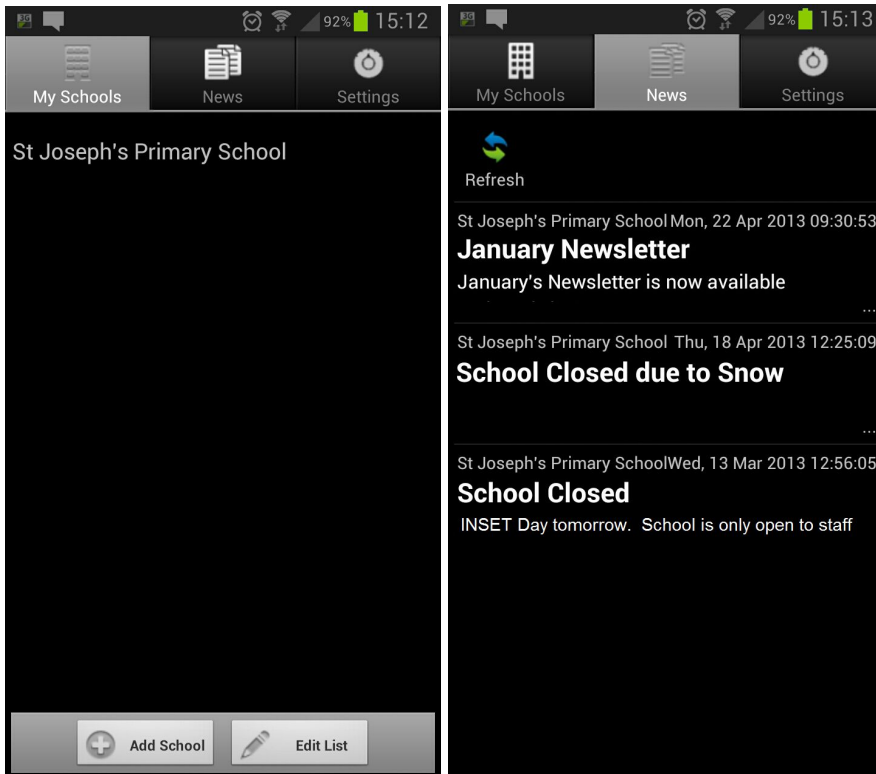

Or you can download the app direct to your phone. Open your App Store and search for **School Updates**, it is free to download and install.

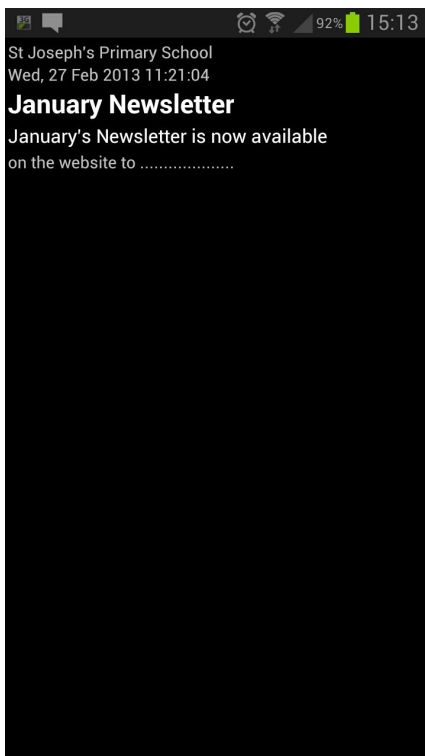

2. Open the App and you will see that there are no schools in the list. To search for your school touch the Add school button at the bottom of the screen, enter the postcode of the school that you are looking for. Place a tick in the box of the school you want and touch the **Accept** button at the bottom of the screen.

3. The news items are displayed in the News Tab. This application gets the news items from the News option in the **Manage > News** section of your School Jotter 2 website. If you touch a news story it will expand so that you can read the whole article.

4. Touch the title of the news article you want to read and the full article will be displayed.

5. In the **Settings** tab you can choose settings of notifications to suit you.
