

# Space – the Final Frontier

## Year 5 Take Home Task Grid

Over this term you can complete one of the activities from the grid each fortnight. You can choose which activity you wish to complete and when.

The activities are mostly open-ended and there are no right or wrong answers. Feel free to present them as creatively as you like.

Remember: learning is exploring!

We are looking forward to seeing the results.

# space – the Final Frontier

## English

Write a letter to an alien explaining your typical school day. What do you do each day in school and what you enjoy.

## Religious Education

Think about the festivals and holidays that are celebrated in the spring time. Find out how the sun has been worshipped by different groups and draw a spider diagram showing this.

## Science

Make a model of the planets thinking about their relative sizes and distances to each other or a poster on the earth, sun and moon and their relationship with each other.

## Geography

Choose one of the large continents and make a chart of their countries, their capital cities and the language/s they speak in each country.

## ICT

Look at the technology that has helped humans to reach the moon and other places in space. Research what has been developed for space. Write a list of what has been developed and how it has helped.

## Art & Design

Scientists and astronauts such as Tim Peake are spending up to six months in the International Space Station. Design a posture reminding them of all of the wonderful things here on earth.
