

Objective	Milestone Indicators	Basic Activities	Advanced Activities	Deep Activities	Resources
<p>Milestone 3</p> <p>To investigate patterns.</p>	<p>Milestone 3</p> <p>Describe how countries and geographical regions are interconnected and interdependent.</p>	<p>On the map on Worksheet 1A, children use the map to investigate which countries were on each side during the war. Children use a world map to label as many countries as they can. When finished, children write a list of the countries they have found on each side.</p>	<p>Provide children with an atlas and a set of Riddle cards. Children work their way through each of the riddles to identify countries of the allies in one colour, countries of the axis in another and neutral countries in a third colour.</p>	<p>Provide children with Worksheet 1C. Explain that children need to identify each country on a map, find the capital city and use books or the internet to find other information, e.g. population and size. Geographically speaking, which side do you think has the advantage: the allies or the axis? Children discuss their ideas with a partner.</p>	<p>PowerPoint slides Worksheet 1A/1C Access to books and the internet Riddle Cards</p>
