

Objective	Milestone Indicators	Basic Activities	Advanced Activities	Deep Activities	Resources
To master practical skills - construction.	<p><b>Milestone 2</b> Strengthen materials using suitable techniques.</p> <p><b>Milestone 3</b> Develop a range of practical skills to create products (such as cutting, drilling and screwing, nailing, gluing, filing and sanding).</p>	With support, use your imagination to create a boat that you can launch in the river and send on its journey to the sea. Remember to use only natural materials. Try to make your boat stable and attractive to look at. Test your boat in the tank of water a few times during the making process to check on its balance and stability.	With prompts, use your imagination to create a boat that you can launch in the river and send on its journey to the sea. Remember to use only natural materials. Try to make your boat stable and attractive to look at. Test your boat in the tank of water a few times during the making process to check on its balance and stability.	Independently, use your imagination to create a boat that you can launch in the river and send on its journey to the sea. Remember to use only natural materials. Try to make your boat stable and attractive to look at. Test your boat in the tank of water a few times during the making process to check on its balance and stability.	<p>A large selection of wood, e.g. bark, sticks, logs, twigs, dowelling, planking</p> <p>Natural string</p> <p>Wood working tools - hacksaws, bench hooks, hand drills, different sized drill bits, hammers</p> <p>Rulers</p> <p>Pencils</p> <p>PowerPoint</p> <p>Fabric, thread and sewing needles</p> <p>A water tank (locate outside)</p>
