

Dalton School

This term our year one children have a series of lessons called 'Mini-Wheelers'. These lessons are designed to teach the children how to use a balance bike effectively, which will help them to ride a bike without ever using stabilisers.

Parts of the lessons are used to 'warm up' and also to locate their own spaces either on foot or on a balance bike.

The children follow instructions carefully and take part in fun activities that build confidence, spatial awareness and dynamic balance skills.

In Key Stage one the children have been completing different types of art work.

This week they used their observational skills to draw different items they found on our playground.

They paid attention to the detail in the leaves, cones and twigs.

Mrs Sherwood was delighted with their concentration and their finished drawings.
