

Ban Use of Plastic Bags

Use reusable bags instead of plastic bags as they are less harmful to the environment. Being non-degradable, plastic bags are lethal. Plastic kills nearly 2 million birds, whales, turtles every year. These plastics choke or get tangled which lead to internal infections, starvation and death.

we can make a difference if we stop putting our litter in the sea and fishermen should guide turtles away from the fishing net. It would be so much more safer for the poor turtles who are suffocating because of your stupid litter.
