Description
<p>The user shall receive an email after first time login. This issue is to create the email template. The flow is as below.</p> <ol style="list-style-type: none"> 1. User logs-in via the homepage 2. The backend creates the user in the DB 3. The backend triggers a email to be sendt to the user based on this template <p><u>Please look at the link below for some inspiration</u> How to create a welcome mail</p>
