INFO

AIRISE TECHNOLOGY is the new **Kapriol technology** derived from the sports world. Top technology and design for a top comfort. Uppers with an enveloping design created with highly technological materials. The total absence of seams guarantees uniformity of thickness for high comfort. **Ultra Soft Cushioning** guaranteed by the EVA and soft PU midsole. **K-Torque System** for excellent stability and maximum comfort in all situations of use.

K-KNIT: an upper characterized by **high breathability** and **adaptability to any shape of the foot**. The union with the **KPU** increases the resistance to tearing and abrasion.

TECHNICAL FEATURES

SPECIFICATIONS

- Mesh upper without seams, with KPU reinforcements at the points of greatest wear
- Padded tongue with bellow to limit the passage of dust
- Light, recyclable, perfectly mouldable aluminium toe cap with the same mechanical resistance of the steel toe cap but more comfortable
- Rubber reinforcement on the toe
- Perforation proof midsole made with polymer synthetic fiber. Guarantees high elasticity, thermic insulation, lightness and comfort. Total foot protection against injuries, cuts and punctures.
- "Ultra Soft Cushioning" midsole
- Outsole with Anti-Skid System to ensure maximum stability even on the most slippery surfaces

MATERIALS

- **Sole:** EVA + PU + Rubber
- **Upper:** Mesh + KPU

DECLARATIONS OF CONFORMITY

- AIRISE KNIT
