

The Future is You!

Katapult Future Fest explores how exponential technologies, consciousness and impact investing can be used to transcend the UN Sustainable Development Goals and build a future we want to live in.

The KFF program aims to increase participants' knowledge and understanding of:

- **Exponential technologies**
Learn from leading experts everything you need to know about the technologies that will take your organization to the next level; AI, Blockchain VR, AR, Robotics, 3D-printing, nanotech, biotech and quantum computing.
- **Consciousness**
Understand the psychology of awareness and how we as humans can make conscious decisions on our use of technology.
- **Impact investing**
Meet impact-driven tech startups and investors that are outperforming the market financially while making the world a better place.

This year we have invited experts to carry out deep-dives on the Future of Education, Environment, Food, Health and Financial Inclusion. We will focus on how YOU can help solve societal and environmental challenges using tools such as exponential technologies, consciousness, and impact investing.

Preliminary Program at KFF19

14th May - Investor Day

Kick-off mingle

15th May

Welcome
Opening plenary panel with experts
Workshops & discussions
Parallel startup pitches
Communal dinners around Oslo
Gathering at The Hub
