Cable Markers

Self-Laminating Wire/Cable Markers – LabelStation self-laminating markers provide a secure & reliable method of marking cables. A wide range of sizes and colours are available.

Heat Shrink Tubing – Heat shrink tubing is available for the LabelStation in a range of diameters ready to overprint with your required text, numbers, symbols or logos.

Tie on Tags – Strong and durable, our Tie on Tags are ideal for attaching to cables, equipment etc with standard cable ties. Custom tags made on request.

See price list for full details.

LabelStation consumables are manufactured from high quality materials to give the best performance for your application. Choose from a wide range of continuous rolls, pre-sized die cut labels, tags and cable markers

LABELSTATION

ACCESSORIES

Industrial Signs & Graphics CD

The optional LabelStation Signs CD contains over 1000 commonly used signs and sign graphics that install seamlessly into the LabelStation design & print software. Categories include Electrical, COSHH, Warning, Mandatory etc.

Mini Keyboard

The mini keyboard is designed to run the LabelStation when no PC is available. Label data can be keyed into pre-set label templates.

Auto Cutter

The LabelStation auto guillotine cutter is ideal when using continuous rolls of label material. Using the LabelStation software you can set your label size and instruct the printer to cut the label to the required length.
