

**Sun room awnings from Griesser.
WGM Top**

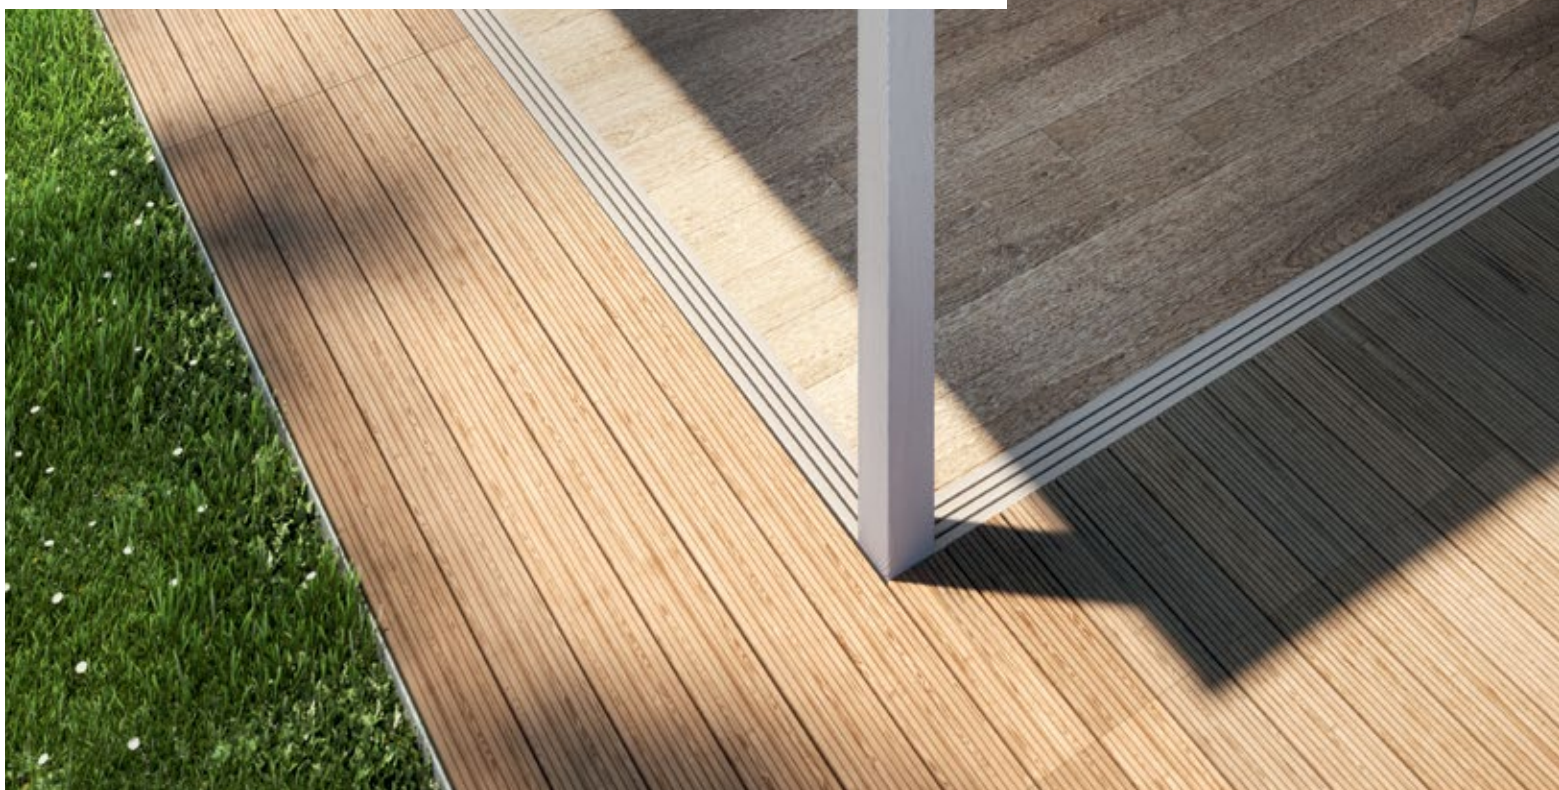

WGM Top

The WGM Top fitted sun room awning creates a pleasant shaded area on your patio or in your sun room where you can linger, even on particularly sunny days. Almost entirely independent of the existing conditions, the WGM Top can be combined with almost every roof structure and thus genuinely enhances your feel-good place.

Product highlights WGM Top

Fitted solar shading – a perfect climate under the roof

The WGM Top is fastened above the glass roof construction by means of support legs. Most of the sun's rays are kept outside the glass roof and there is a smaller build-up of heat in the space under the patio roof .

Thanks to the wide selection of different support leg heights, WGM Top adapts to most configurations.

Strong design

The slender profile and screw-free appearance underline the modern design of the WGM Top. This stylish element blends perfectly into the overall look of the house façade.

Fabric and technical elements protected in the cassette

The completely closed and robust awning cassette protects the fabric and technical elements from the weather.

Stretch and OptiStretch models

WGM Top is available in two models: Stretch and OptiStretch. With OptiStretch, the fabric is pulled taut on all four sides. This offers the advantage of a particularly taut fabric and no light gaps at the sides.

The basic Stretch version is pulled taut on two sides and there is a light gap between the fabric and the side profile. With both models, a powerful tensioning system ensures an even fabric positioning.

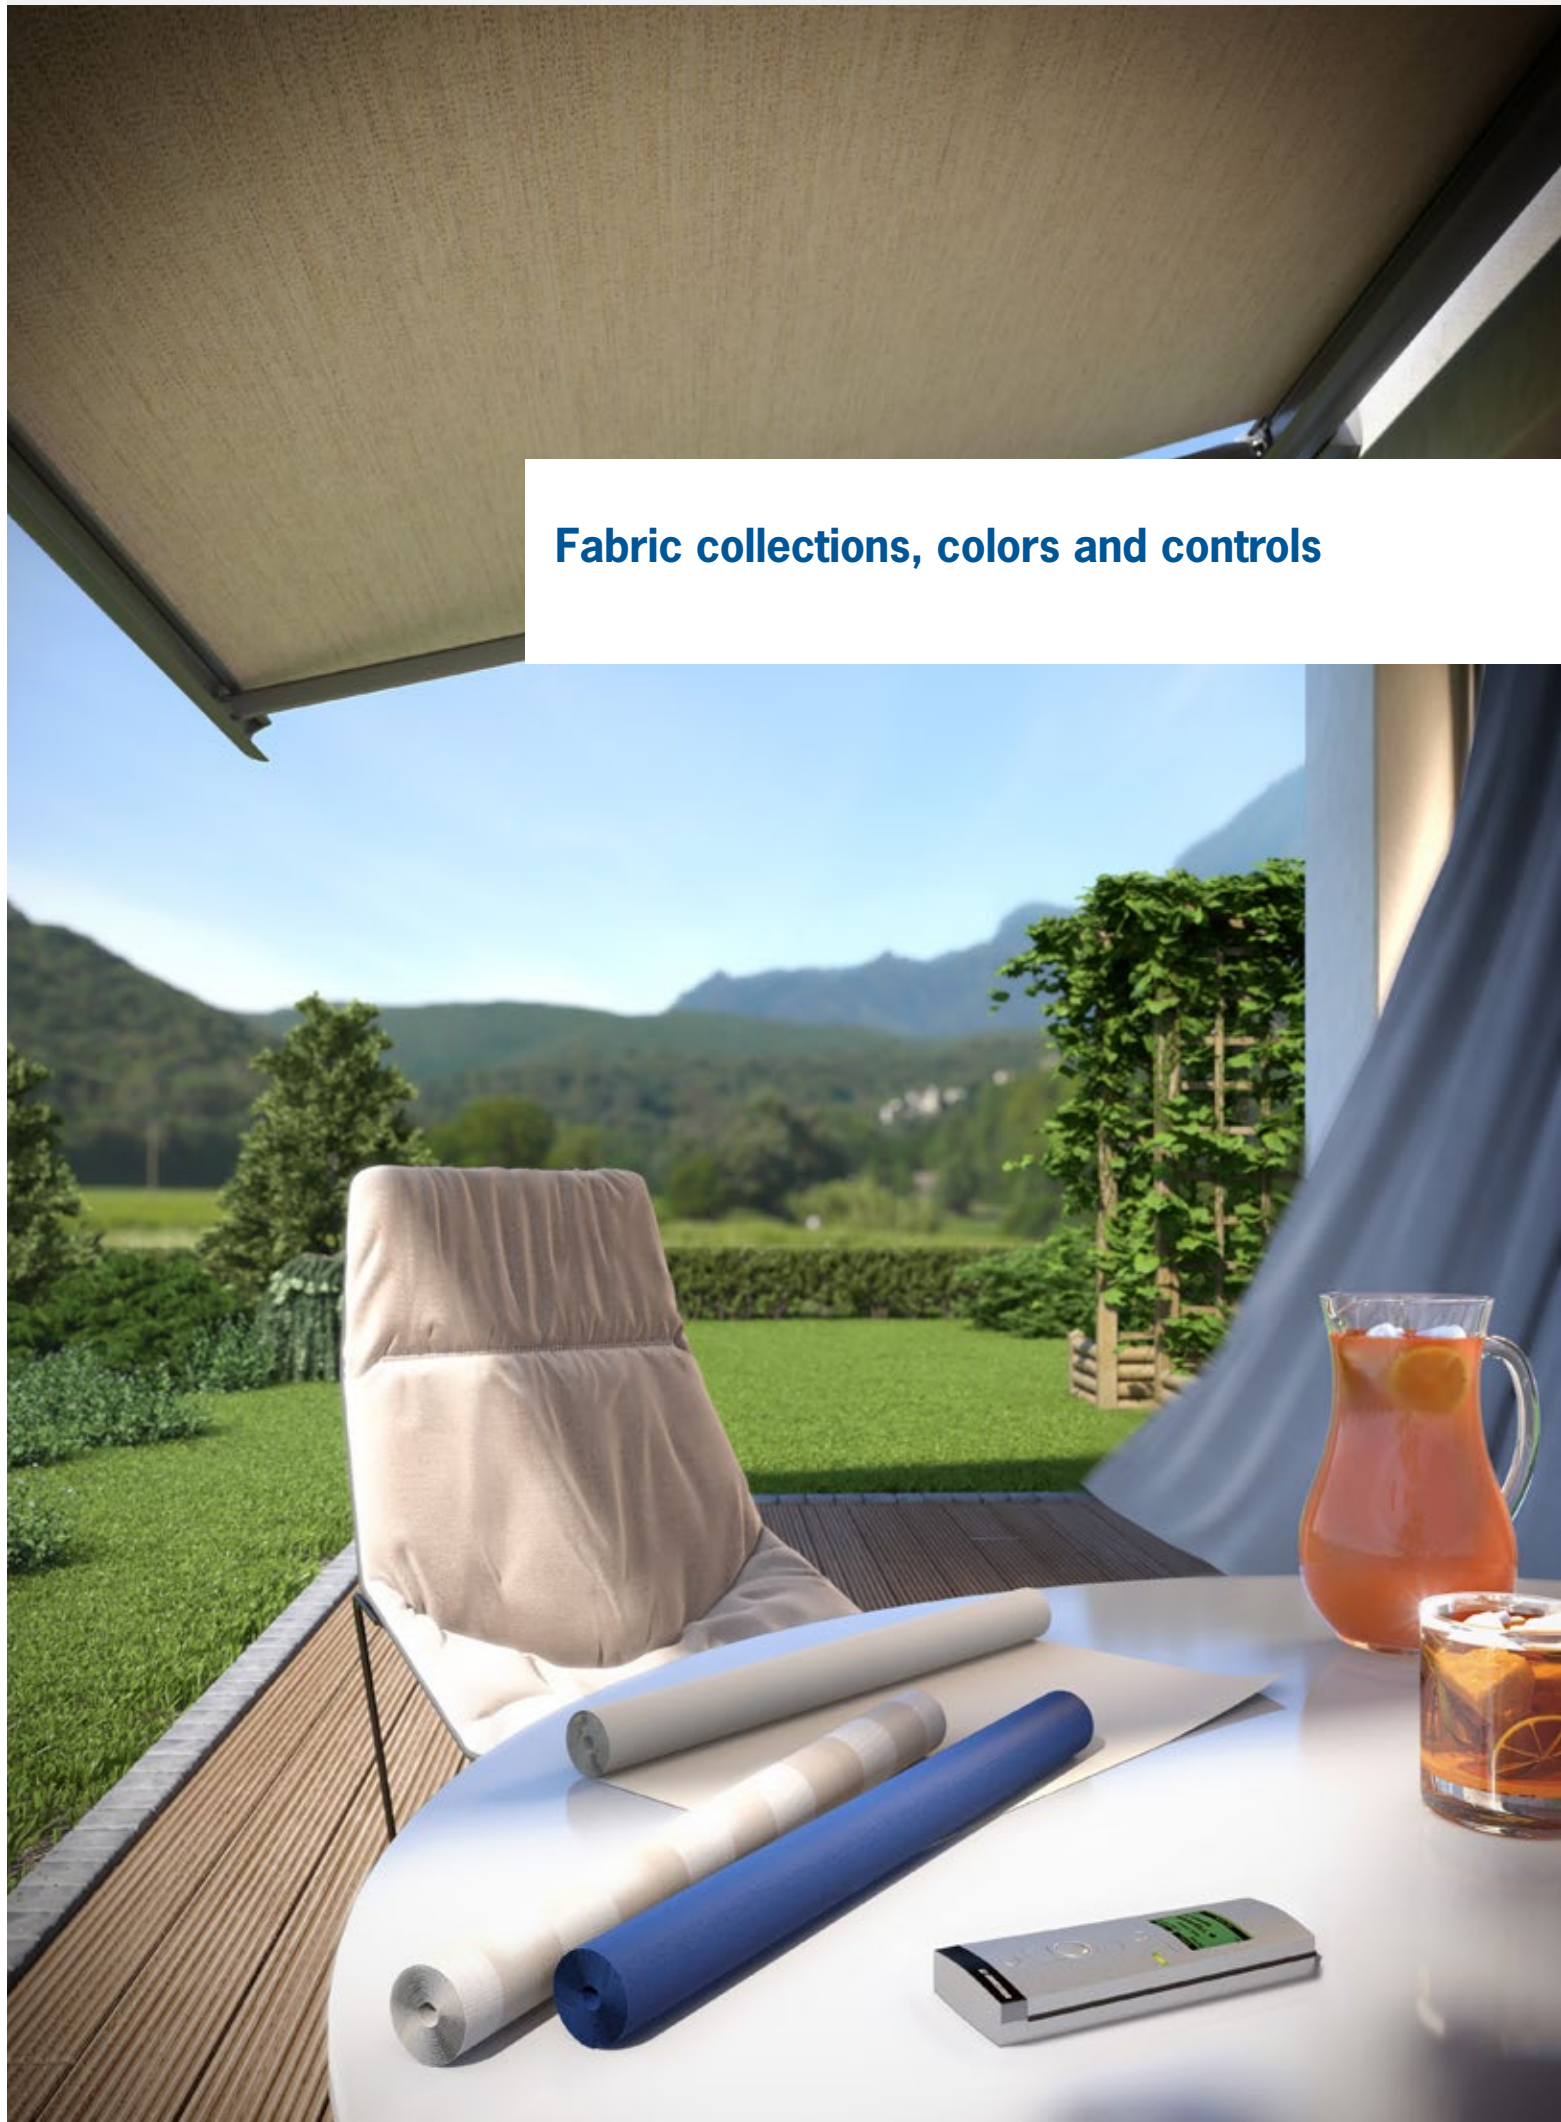

High wind stability

An optional sun/wind sensor ensures that you still have enough shade, even when the wind is blowing, and that the awning is retracted in good time if the weather turns stormy.

Fabric collections, colors and controls

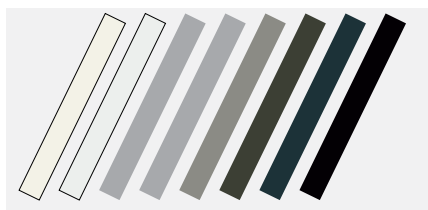

FABRIC COLLECTION

Collection Cuba

The awning patterns of the Collection Cuba are coordinated with the color schemes of today and are divided into the 4 worlds of color of Gran Teatro, Coffee, Cars and Sea. There is a suitable awning fabric for every taste. All of the materials have, thanks to state-of-the-art nanotechnology, dirt-repellant and water-repellent properties.

Surface structure

Semi-gloss
