Thank you for purchasing my Virtual Business Card! Once your card is finished, I will also send you a tip sheet on different ideas about sharing your new card.

Your virtual business card will be Branded! The URL will be yours! For example: VCard.MuttButs.com. In order to do this, I will need access to your domain login to add what is called the subdomain. You will remain the registrant and own your domain, I simply need to login in and update your DNS records so that it comes up on your site. This will be done after you approve of the virtual business card design.

If you do not own a domain, you need to purchase one. I recommend NameSilo for under \$10 per year and it includes privacy: MuttButs.com/NameSilo
