

IMPLEMENTATION PLAN

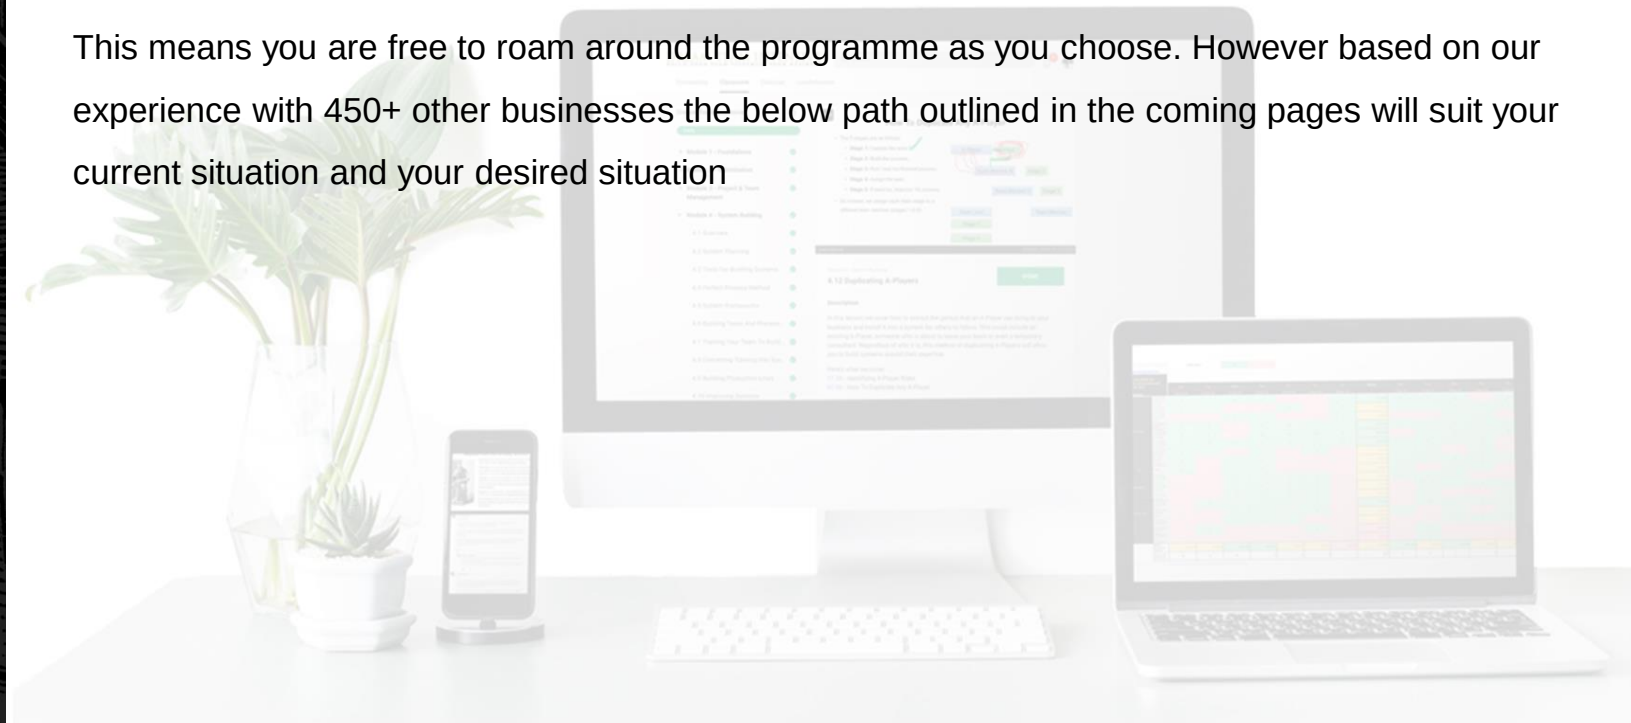

DREAM TEAM INTENSIVE
BUILD YOUR TEAM - SYSTEMISE YOUR BUSINESS

How To Use This Document:

This personalised Implementation plan explains how to get the most out of the Dream Team Intensive based on your current situation.

Although this program has been designed to act like a toolbox whereby you can enter into any lesson and any module to take what you need for your systems, we have optimised different modules to address different situations .

This means you are free to roam around the programme as you choose. However based on our experience with 450+ other businesses the below path outlined in the coming pages will suit your current situation and your desired situation

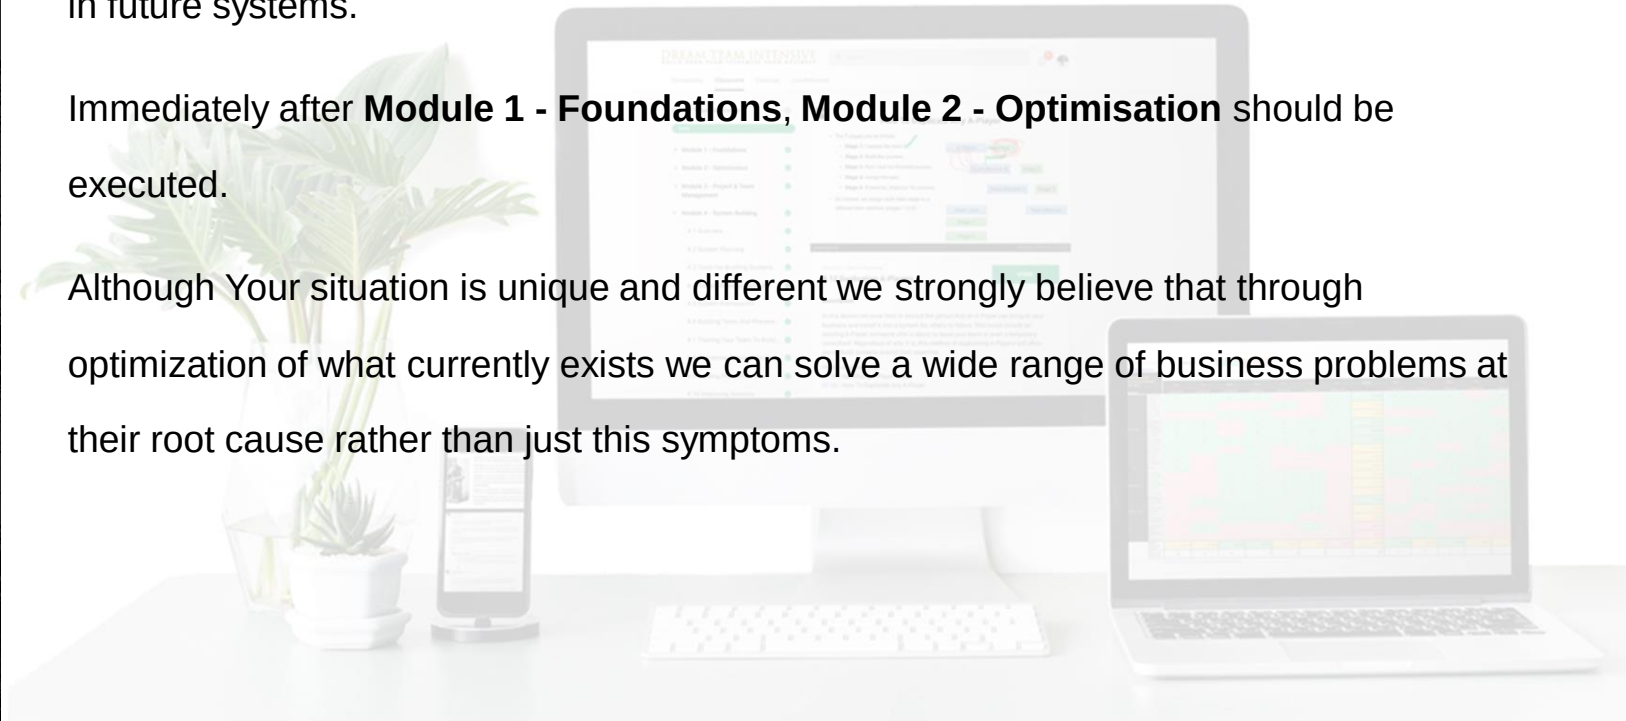

How To Use This Document:

As always, we suggest starting with **Module 1 – Foundations** and, **Module 2 - Optimisation** .

Module 1 – Foundations will guide you through the foundations of our approach to systemising any business in any industry. It will also provide us with the tools that we'll use in future systems.

Immediately after **Module 1 - Foundations**, **Module 2 - Optimisation** should be executed.

Although Your situation is unique and different we strongly believe that through optimization of what currently exists we can solve a wide range of business problems at their root cause rather than just this symptoms.

Implementation Plan :

Based on your current situation we suggest completing the program modules in the following order although you are certainly allowed to explore the resources at your own discretion.

Module 1 - Foundations

Module 2 - Optimisation

Module 6 - Management
