

Using the App to add availability

1. Select [My Availability](#) on the dashboard
2. Using the calendar displayed, select the date you wish to provide availability for.

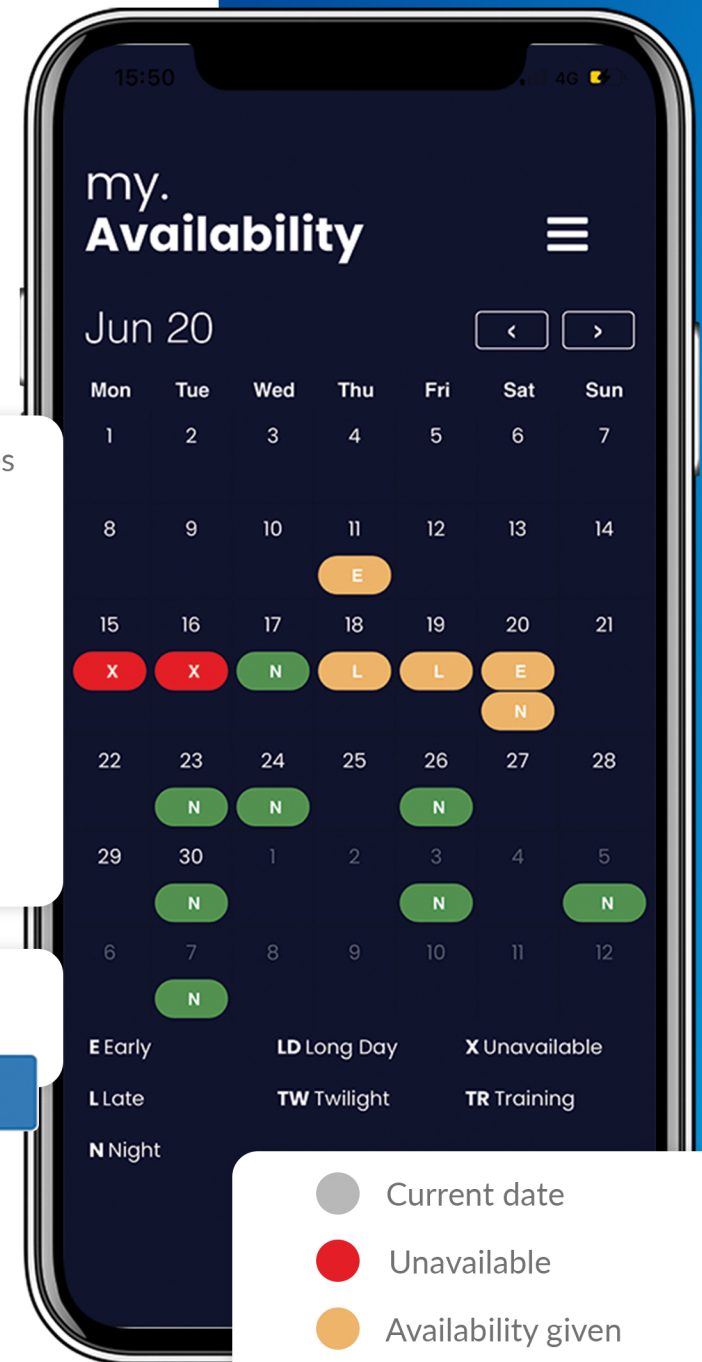

3. Select the shift type you would like for this date.

4. If you have already provided preferences you can simply provide the shift type you would like to work and press confirm availability. If you would like to provide availability for a specific hospital, you can do so by selecting the Hospital from the drop down menu and writing the hospital(s)/ward(s) you would like to provide availability for in the preferences box below. You are free to list as many Hospitals/Wards as you wish

5. Select Save Event to confirm the availability.

+ Save event

- Current date
- Unavailable
- Availability given
- Shift booked
