

LEAF Product List

Version Number: v1.5
Applicable to: LEAF Marque Standard v16.0

Publication Date: Sep-22
Effective from: Sep-22

LEAF Marque Approved Baseline Certification Systems

Tab 3: Approved Baseline Systems lists the LEAF Marque approved baseline certification systems. Abbreviations used in the Product List are detailed here.

Scope

The LEAF Product List is not a definitive list; products can be removed or added with approval by LEAF Marque. The LEAF Team is responsible for carrying out the

Production Information

The LEAF Product List is relevant for all LEAF Members, but it also has additional relevance for LEAF Marque certified businesses. LEAF Members should update their products as appropriate on myLEAF in “Production Information”, either when completing the LEAF Sustainable Farming Review, or by updating membership details.

Products on the LEAF Product List does not include cover crops, catch crops, or equivalent.

The products entered in ‘Production Information’ are representative of the farming year and not just the products at the time of completion, to the best of your knowledge. LEAF Members should select from the LEAF Product List all products that are produced by that business in a farming year.

If a LEAF Marque certified business adds a product that wasn't included in their most recent LEAF Marque audit, the following scenarios apply:

- If the product has a LEAF Marque approved baseline certification system, the business can still be certified if the LEAF Marque Standard requirements are applied to the product, and if the product is not sold as LEAF Marque certified. If the business wishes to sell the product as LEAF Marque certified, a new audit is necessary.
- If the product does not have a LEAF Marque approved baseline certification system, the product must meet the exemption criteria stated in Control Point 1.2 of the LEAF Marque Standard. If the criteria is not met, the business’ LEAF Marque certification will be revoked. If the criteria is met, the business’ certification would remain valid as long as they meet the requirements in the disclaimer stated below (i.e. LEAF Marque Standard applied to product, product is not sold as LEAF Marque certified etc).

For further guidance on the LEAF Product List, please see the LEAF Product List: Supporting Document

LEAF Marque will review any suggestions for additions, removals, or amendments to the LEAF Product List. Please send your comment to info@leafmarque.com.

Disclaimer for LEAF Marque certified businesses that meet the exemption criteria in Control Point 1.2 of the LEAF Marque Standard v15.0

If a business does not have an approved baseline system for all the business’ products (i.e. if “Other” has been selected from the LEAF Product List, or if the approved baseline system as stated on the LEAF Product List is not held), the business can only obtain LEAF Marque certification if they fit the exemption criteria stated in Control Point 1.2 of the LEAF Marque Standard. In these circumstances, these products will not appear on the LEAF Marque certificate, and the following rules must be adhered to. Firstly, the requirements of the LEAF Marque Standard apply to the whole business enterprise regardless of whether the products grown/reared appear on the LEAF Product List. Secondly, any cultivated/reared products which are not covered by a LEAF Marque approved baseline system must:

- not be marketed or sold as LEAF Marque certified (either through use of the LEAF Marque logo or in other marketing and communication materials)
- be included in ‘Production Information’ within the ‘myProfile’ section of ‘myLEAF’, along with the respective production area
- be identified as a product without an approved baseline system at your LEAF Marque audit and confirmed as such by your auditor

Class	Product Number	Product	Scientific Name	Product Code(s)	LEAF Marque Approved Baseline Certification Systems			Added to Product List
