## LEAF Marque Approved Baseline Certification Systems

*Tab 3: Approved Baseline Systems* lists the LEAF Marque approved baseline certification systems. Abbreviations used in the Product List are detailed here.

## Scope

The LEAF Product List is not a definitive list; products can be removed or added with approval by LEAF Marque. The LEAF Team is responsible for carrying out the approval, removal, and review process for products on the LEAF Product List. Only products with at least one baseline system, and that are cultivated/reared (not wild) are included.

## LEAF Sustainable Farming Review - Production Information

The LEAF Product List is relevant for all LEAF Members, but it also has additional relevance for LEAF Marque certified businesses. LEAF Members should update their products as appropriate on myLEAF in "Production Information", either when completing the LEAF Sustainable Farming Review (LSFR), or by updating membership details.

Products on the LEAF Product List does not include cover crops, catch crops, or equivalent.

The products entered in 'Production Information' of the LSFR are representative of the farming year and not just the products at the time of completion, to the best of your knowledge. LEAF Members should select from the LEAF Product List all products that are produced by that business in a farming year.

If a LEAF Marque certified business adds a product that wasn't included in their most recent LEAF Marque audit, refer to 2.10 of the LEAF Marque System Rules

If a specific product is not included on the product list please select a similar product if one exists. LEAF Marque will review any suggestions for additions, removals, or amendments to the LEAF Product List. Please send your comment to [info@leafmarque.com](mailto:info@leafmarque.com).
