LEAF in 2015
Delivering more sustainable farming and food
The weather during 2015 has been better for most UK farmers. Bumper UK wheat yields were achieved but so too was the global harvest, resulting in tumbling commodity prices. UK dairy farmers were equally affected by increasing yields overseas; the outcome a 25% average fall in UK milk prices for producers. Clearly this situation is not sustainable in the long term.

Following the election, Defra Minister Elizabeth Truss quickly gathered together leading representatives from the UK Food and Farming Industry to develop a 25 year plan. Its key themes are focused on innovation, research and development, the sharing of expertise and available data and the drive to improve skills within the industry. The aim in bringing together various parts of the food industry was to discuss how best to grow UK food production, sell more UK sourced food at home, increase exports, use new technology on farms and promote the British Brand.

LEAF is an organisation which knows about brands and the LEAF Marque is sought after by farmers. It is accepted by retailers and increasingly recognised by consumers. For over twenty four years LEAF has been the driving force in promoting sustainable food production whilst maintaining and improving the earth’s natural resources. Caroline, her team, LEAF members, retailers and the wider food and farming industry have worked closely together and are to be congratulated on their success to date. I believe there are big opportunities ahead in developing the brand to more products and for informing the public about the advantages of sustainably produced and traceable food. Open Farm Sunday is one way this engagement is promoted as are visits to LEAF’s network of Demonstration Farms; my sincere thanks go to you all.

LEAF celebrates twenty five years in 2016. Let’s make it a year to remember.

Baroness Hazel Byford DBE DL
From the Chairman

2015 has been another very positive year for LEAF. New LEAF Demonstration Farms and Innovation Centres have been opened to add to the outstanding network that our team has developed and improved over the years. At our Annual Conference in November, Professor Dame Anne Glover spoke eloquently about the urgent need to continue funding new science for our industry, and most importantly to encourage its adoption in practice.

Open Farm Sunday broke all records with attendance and the whole agricultural industry owes a debt of gratitude to all the participating farmers and their numerous helpers for the way in which they portray the good messages about British food and farming.

Our LEAF Network of Demonstration Farms and Innovation Centres has a great role to play in trying out new ideas and techniques, and some of them are leading the way in what I see is a gradual change taking place in our industry. Young men and women, impatient to shake off the constricting blanket of support systems, are looking critically at the state of our soils, static yields and the march of the blackgrass menace, and developing strategies to make Integrated Farm Management the cornerstone of our farming. In the livestock industry too, great strides are being made in improving genetics and embracing the use of genomic technologies to bring us greater productivity, feed conversion and eating quality. These are exciting times for those willing to embrace change, and I hope that many LEAF farmers, using the range of tools we make available, will be in the vanguard of that change.

It is instructive to look at how other industries are coping with the new economic order resulting from the emergence from recession. The chairman of BAE Systems, one of our largest manufacturing companies, in looking at the renaissance of British manufacturing, asked what has changed. Foremost, he said was attitude. “There is now a recognition that we are entitled to nothing: we must strive for everything, and our place in the competitive world can be held only by developing the highest skillset and having a mindset of continuous improvement.” That is a message we should all bear in mind, and indeed the board and staff will be doing just that as we prepare our strategy for the next five years.

As we prepare for the challenge of 2016 and beyond, I take the opportunity to thank all the LEAF team for their hard work and dedication over the last year, and to the members of the board, who with their experience and time freely given help guide LEAF to its vital role of linking profitable farming with the highest standards of environmental stewardship.

Stephen Fell, MRICS FRAgS
As LEAF approaches its 25th year it is interesting to reflect on our achievements and learn from the mistakes we have made. The world is a hugely different place to the one into which LEAF was born. We face economic uncertainty, climatic fragility and an ever more inquisitive and demanding public.

I would like to think we are an AGILE organisation – Adaptive (flexible and ready for change), Growing (seeking new ways to differentiate), Innovative (proactive in what we do), Lean (efficiency is valued in our farming systems and the organisation), and Expectant (always assuming change). During the past 25 years we have certainly made a valuable contribution to the understanding, delivery and promotion of more sustainable food and farming.

We have remained true to our core values and through the development and promotion of Integrated Farm Management provided a logical framework for farmers to adapt to the changes around them – in our markets, our climate and consumer demands and expectations.

All of this has happened as a result of the wonderful support of our members – corporates and individuals, sponsors, our Trustees, committees, staff and supporters. Thank you so much and well done. Together we have achieved a lot, but there is so much more to be done. With the impact of climate change rising up the agenda, identifying the opportunities for farming to be part of the solution is critical. That is why we will be focusing our efforts for 2016 and beyond on LEAF – delivering healthy food and farming, fit for the future.

This year’s annual review provides just a snapshot of our achievements delivered through our core activities of:

- Knowledge generation and exchange, though our wonderful LEAF Demonstration Farmers, Innovation Centres and effective management tools
- Market opportunity, through the strengthening and growth of LEAF Marque
- Public engagement, through the hugely successful Open Farm Sunday and Open Farm School Days.

2016 looks to be a memorable year for LEAF and we look forward to continuing to work with you as we prepare our members for the next 25 years of achieving healthy food and farming. Ensuring farming businesses are fit for the future.

From the Chief Executive

Caroline Drummond, MBE
The year at a glance

Spring 2015

Facilitating sustainable farming knowledge generation and exchange is one of LEAF’s overarching core activities. We work with farmers, the food industry, scientists and consumers to inspire and enable sustainable farming.

We do this through our network of Demonstration Farms and Innovation Centres, developing management tools for farmers and through technical events. During the first quarter of 2015, we held a technical event on sustainable soil management, bringing farmers together to focus on this key area of Integrated Farm Management.

Measuring and evaluating what impact our work and our members are making to the delivery of more sustainable farming across the globe, is key to LEAF’s ongoing growth. Our Global Impacts report, published in March and launched at the International Food and Drink Event, reported significant growth in the area of crops grown to LEAF Marque standards, which reached 266,324 hectares with a nearly 30% increase in the area of LEAF Marque crops being grown in Northern Europe. Hugely positive results that we are continuing to build on.

Summer 2015

We were delighted to launch our first two glasshouse businesses as Demonstration Farms - Tangmere Airfield Nurseries Ltd and Eric Wall Ltd. They will play a critical role in showing how the principles of IFM can be applied to the glasshouse sector.

Another significant achievement for LEAF was achieving full membership of the iSEAL (International Social and Environmental Accreditation and Labelling) Alliance, the global membership association for sustainability standards, providing third party acknowledgement that LEAF Marque standards are robust and credible.

2015 was a special year as we marked the 10th anniversary Open Farm Sunday. The theme of this year’s Open Farm Sunday was celebrating British farming and food and we certainly did this in style! Total visitor numbers went over a quarter of a million with 291,000 people visiting events – representing a 40% increase compared to 2014. A huge thanks to the 389 dedicated farmers who hosted events and their 10,000 helpers – what a day for the whole industry to be proud of. Our growing Open Farm School Days initiative continues to play a vital role in connecting young people with where their food comes from and how it is produced. This year, we extended the initiative throughout June and saw over 6,000 school children out on farms.
The year at a glance

Autumn 2015

Providing farmers with the right tools and resources to deliver Integrated Farm Management is one our key activities. We were delighted to launch the third in our ‘Simply Sustainable’ series of technical guidance booklets – ‘Simply Sustainable Biodiversity’. Based on Six Simple Steps, it provides practical guidance to help farmers monitor, manage and enhance biodiversity through the adoption of IFM. Our grateful thanks to Asda for supporting all our Simply Sustainable booklets.

A further development this year has been the LEAF Marque Chain of Custody, which we began to roll out during the third quarter of 2015. Providing a clear, transparent and independent framework for mapping and monitoring LEAF Marque supply chains, it will help ensure integrity and transparency along the whole supply chain from gate to plate. It was wonderful to see some of our LEAF Marque producers recognised at the National Trust Fine Farm Produce Awards. We were also delighted that the LEAF Marque standard was accepted as one of the Sustainability Initiative Fruits and Vegetables (SIFAV)’s approved environmental standards. SIFAV aims to make imports of fruits and vegetables from Africa, Asia and South America 100% sustainable by 2020.

Winter 2015

Our Annual Conference brought together nearly 150 people from across the food and farming industry to explore the challenges of climate change, population growth and growing health issues. Key note speaker, Dame Professor Anne Glover DBE FRSE, stated clearly that science, innovation and public engagement should take centre stage.

Pushing forward the science behind IFM and communicating it to farmers is the key purpose of LEAF’s Innovation Centres. We were extremely pleased to launch the North Wyke site of Rothamsted Research as our latest Innovation Centre. It will play a leading role in showcasing and developing sustainable farming methods, particularly in the area of grassland systems.

Our annual Open Farm Sunday ‘Sharing Successes’ event for our sponsors also welcomed local host farmers and regional co-ordinators to review this year’s outstanding achievements, discuss plans for 2016 and announce extending the reach of Open Farm Sunday for our second decade. Finally, we held two lively and informative ‘Speak Out’ training events for LEAF Demonstration Farmers at the end of 2015.

Adama Agricultural Solutions UK, the leader in off-patent crop protection solutions. Trust, efficacy and innovation are at the centre of our Advanced and Essentials crop protection products.

For more information contact us at ukenquiries@adama.com

Use plant protection products safely. Always read the label and product information before use.

For further product information, including warning phrases and symbols, refer to www.adama.com/uk or call The Technical Helpline on 01635 876 622.

---

A Year in Numbers

266,324 hectares of crop on LEAF Marque certified businesses across the world.

33 countries across the globe with farms producing to LEAF Marque standards.

25% of UK fruit and vegetable crop are grown on LEAF Marque certified businesses.

1 technical on-farm event held and 3 videos produced focusing on specific IFM issues.

2 LEAF Demonstration Farms launched and a new LEAF Innovation Centre - the North Wyke site of Rothamsted Research.

Simply Sustainable Biodiversity is published with support from Asda.

6,000 children visiting a farm as part of Open Farm School Days – engaging children with food, farming and the natural environment.

389 farms opened their gates for the 10th anniversary Open Farm Sunday – a huge thank you to all of them.

291,000 visitors to another record breaking Open Farm Sunday 2015.

---

Proudly Supporting LEAF
Facilitating knowledge generation and exchange

...through our network of LEAF Demonstration Farms and LEAF Innovation Centres, farm business management tools, technical events and resources

Facilitating knowledge generation and exchange amongst farmers and researchers is absolutely fundamental to driving forward more sustainable farming through Integrated Farm Management.

The LEAF Sustainable Farming Review, launched at the end of 2014, has been received very positively by our members. Its new format and functionality offers farmers an easy to use on-line management tool enabling them to step back, consider their farming practices and identify areas of improvement. We continue to develop the LEAF Sustainable Farming Review and in 2016, it will include a hugely valuable benchmarking capability.

Showcasing and developing the sustainable farming practices of IFM is one of the main functions of our LEAF Network. We were delighted to launch our very first glasshouse businesses as Demonstration Farms - Tangmere Airfield Nurseries Ltd and Eric Wall Ltd. And our LEAF Network was further strengthened with a new LEAF Innovation Centre - the North Wyke site of Rothamsted Research, providing world renowned expertise, particularly in the area of grassland systems.

Furthermore, as part of our ongoing work with Catchment Sensitive Farming, we have produced three practical videos looking at Integrated Pest Management, cover crops and filter fences.

Key achievements in 2015

- Working closely with LEAF Demonstration Farmers, Innovation Centre representatives and our members to disseminate best practice and new technologies
- Promoting Integrated Farm Management through a wide programme of talks across the food and farming industry - both here and in Europe
- Ongoing development of the LEAF Sustainable Farming Review to ensure we respond to users comments and it keeps pace with industry legislation
- Launch of the first glasshouse LEAF Demonstration Farms - Tangmere Airfield Nurseries Ltd and Eric Wall Ltd
- The launch of ‘Simply Sustainable Biodiversity’ – the third in our ‘Simply Sustainable’ series of technical guidance booklets, supported by Asda
- Regular IFM Bulletins, Ebriefs and newsletters promoting sustainable farming
- Ongoing involvement in the Sustainable Intensification Platform (SIP) – a Defra funded project looking at how IFM can contribute further to sustainable farming nationwide.
Developing market opportunities

... through the LEAF Marque standard – a global assurance system recognising products that are farmed more sustainably

LEAF Marque is recognised by farmers, food manufacturers, retailers, consumers and Governments as a leading assurance scheme for more sustainably farmed products. Since its launch in the UK in 2003, there are now farmers in 33 countries producing to the LEAF Marque standard.

We are proud of the partnerships we have developed, with growers, processors and retailers including Waitrose, Florette, Burts Chips and Farrington Oils. Our partnership with Unilever continues to strengthen as they look to source LEAF Marque oilseed rape for their spreads and dressings as part of their Sustainable Living Plan.

Our third global impacts report, published in March, highlighted continued growth in the area of crops across the globe being grown to the LEAF Marque standard, which reached more than 250,000 hectares. We were also delighted to report a 29% increase in the area of LEAF Marque crops in Northern Europe.

A huge achievement this year was gaining full membership of the ISEAL (International Social and Environmental Accreditation and Labelling) Alliance, the global membership association for sustainability standards. Full membership is the gold standard and provides third party acknowledgement of all the work that goes into ensuring LEAF Marque standards are transparent and credible.

As part of our commitment to ensuring LEAF Marque remains robust and accountable, we started to roll out LEAF Marque Chain of Custody. This represents a huge investment for LEAF and will be critical in driving forward full traceability across LEAF Marque supply chains.

Key achievements in 2015

• Our third global impacts report shows a significant growth in the amount of land across the globe growing to LEAF Marque standards, which reached 266,324 hectares
• Roll out of LEAF Marque Chain of Custody – developing robust and transparent LEAF Marque supply chains
• Achieved full membership of ISEAL – the gold standard for global sustainability standards
• LEAF Marque growers recognised for their commitment to sustainable farming. Gina and Peter Smithies from Pembrokeshire and Victoria and James Hawkins from Worcestershire were recognised at this year’s National Trust Fine Farm Produce Awards. And LEAF Marque producer, Carroll’s Heritage Potatoes were named Arable Innovator of the Year 2015 at the British Farming Awards.
Thank you to all our members and sponsors who have helped support our work over the year.
Engaging the public in sustainable food and farming

... through Open Farm Sunday, Open Farm School Days, LEAF Demonstration Farms, resources, training and the Virtual Farm Walk

Connecting and engaging with consumers about where their food comes from and how farmers care for the countryside is a fundamental part of Integrated Farm Management. Through Open Farm Sunday, Open Farm School Days, Demonstration Farms and many more communications tools, we reach out to the public to build trust and understanding in farming and food production.

Our 10th anniversary Open Farm Sunday on 7th June was another record-breaking success with over a quarter of a million people visiting farms across Britain for farming’s national open day - a staggering achievement; thank you to everyone involved.

Open Farm School Days continues to grow. We were delighted to work in partnership with Farming And Countryside Education (FACE) to deliver four free School Farm Visit workshops. We are also a proud partner of the new Countryside Classroom which is a single on-line destination where teachers can access resources, places to visit and people to ask to help teach about food, farming and the natural environment. LEAF also continues to be an active member of the Access to Farms partnership.

Providing farmers with the skills and know-how to communicate their farming messages in engaging ways is at the heart of our Speak Out initiative and we were delighted to hold some lively Speak Out training events during the year. Work also continues on updating our on-line Virtual Farm Walk with some exciting new sections and downloadable resources.

Key achievements in 2015

- 389 farms opened for Open Farm Sunday welcoming 291,000 visitors – our best year yet!
- 6,000 school children visit farms throughout June as part of Open Farm School Days
- Free Open Farm Sunday Information Events held for host farmers to exchange ideas and get inspired
- School Farm Visit workshops delivered in conjunction with FACE
- Speak Out training events held – equipping farmers and researchers with communication skills and resources
- Proud to be a partner of Countryside Classroom an industry wide initiative committed to sharing our knowledge, experience and passion for farming, food and the natural environment.
Working in Partnership

... with our members, farmers, industry partners and the public to inspire and enable more sustainable food and farming

LEAF works together with our members, Demonstration Farmers, Innovation Centre representatives and partners across the wider food and farming industry who share a common goal of delivering more sustainable food and farming. We are very proud of our alliances, they are absolutely vital to our continued growth and impact.

We are pleased to be involved with the Sustainable Intensification Research Platform (SIP) – a multi-partner industry initiative funded by Defra to explore sustainable intensification. We are also delighted to be a partner in an exciting new initiative ‘Innovative Farmers’ providing farmers with research support and funding for sustainable farming.

We continue to be involved with the Campaign for the Farmed Environment (CFE) as well as a number of other voluntary-led initiatives including the Greenhouse Gas Action Plan, Tried and Tested, Catchment Sensitive Farming and The Voluntary Initiative. All great examples of how the industry is working together, pooling expertise to develop, demonstrate and promote sustainable farming.

Our membership of EISA (European Initiative for Sustainable Development in Agriculture) is critical to ensuring the uptake of Integrated Farming across Europe. In early June, we hosted a meeting with EISA members, representatives from EU farming organisations and Julie Girling MEP, to discuss EISA’s vision and strategy and its wider role within EU farming policy.

Furthermore, we were delighted to continue our support of the GWCT’s Big Farmland Bird Count which serves to showcase the wonderful conservation work that’s going on across the country to help farmland bird numbers.

Key achievements in 2015

- Partner in the Sustainable Intensification Research Platform (SIP) and ‘Innovation Farmers’ both developing the capacity of farmers for sustainable farming
- Ongoing involvement with key industry initiatives including Campaign for the Farmed Environment, Catchment Sensitive Farming, Greenhouse Gas Action Plan, Tried and Tested and The Voluntary Initiative
- Continued collaboration with EISA (the European Initiative for Sustainable Development in Agriculture) delivering Integrated Farming across Europe.
- Partners with GWCT and FWAG Association in the Big Farmland Bird Count, helping to showcase the conservation efforts of farmers, landowners and gamekeepers to safeguard farmland birds.

Reduce unit cost of production through increased yield and quality whilst improving the crops natural defence against disease.
LEAF’s 25th Anniversary

LEAF - delivering more sustainable food and farming fit for the future

LEAF celebrates its 25th anniversary in 2016. Set up in 1991, LEAF is now the leading global organisation delivering more sustainable food and farming.

During this momentous year we have a range of exciting fundraising activities for which we are seeking sponsorship or in kind support including:

- LEAF Marque Summit
- LEAF Network conference
- Consumer Engagement conference
- Auction prizes for a fundraising dinner
- Barn dance
- 5km sponsored run
- Bicycle ride
- Cookery book
- Open Farm Sunday 2016
- On-line and printed materials

Join in the celebrations!
Get in touch to find out more about sponsorship opportunities

Delivering Sustainable Farming Through Integrated Farm Management

LEAF helps farmers produce good food, with care and to high environmental standards through Integrated Farm Management.

LEAF’s Integrated Farm Management (IFM) is a whole farm business approach that delivers more sustainable farming. LEAF produces a number of tools and resources to help farmers farm more sustainably through Integrated Farm Management. These include:

- The LEAF Sustainable Farming Review – an online self-assessment management tool
- The LEAF Marque – an assurance system recognising produce grown to LEAF’s IFM principles
- LEAF Demonstration Farms and LEAF Innovation Centres – demonstrating IFM in action
- A range of technical resources including the IFM Bulletin, Soil Case Studies, LEAF Information Centre, Simply Sustainable series of handbooks on soil, water and biodiversity
- Integrated Farm Management: A Guide – a guidebook highlighting the key principles of IFM and the benefits of following an integrated farming approach.

Integrated Farm Management is delivered in store by the LEAF Marque.

SUSTAINABLE GROWTH

Unilever is proud to work with LEAF as a partner to help us meet our goal of sourcing 100% of our raw materials sustainably by 2020.
