We also have an extended list available (19 pages). This can be printed at Reception for a nominal fee, or alternatively we can email these lists to you.

BIRDING GUIDES

Birdwatchers flock to this area to catch a glimpse of some of South Africa's most sought-after species. Mpumalanga boasts a huge variety of threatened, endemic and highly sought-after species from Blue Swallow, Rudd's and Botha's Lark, Wattled Crane and Southern Bald Ibis to Martial Eagle, Narina Trogon, Bush Blackcap and Orange Ground Thrush.

"The Lowveld is a more or less flat savanna of mixed bushveld. Plant communities differ in relation to underlying soil types and average rainfall, with acacia woodland and broad-leaved woodland dominating in places. Sugarcane and citrus orchards occupy much of the area south of the Crocodile River, but most of this region is conserved within the Kruger National Park and adjacent private reserves." - Birdlife SA

An exciting initiative along all the birding routes and in the areas adjacent to birding hotspots and IBA's, is the availability of Community Bird Guides. The guides provide improved security and valuable information on where elusive and special bird species may be found, and in some cases can gain you access to otherwise restricted locations. These guides are self-employed and offer very competitive rates within the guiding industry. Qualified, registered and experienced guides are available to help you get the most out of your birding experience.

HIPPO HIDE

Situated overlooking the Sabie River, alongside the 2nd fairway, no visit to Kruger Park Lodge is complete without spending some time in our beautiful Hippo Hide. Looking out over the "lake", the hide offers the perfect vantage point from which to do some hippo spotting or birdwatching. Please feel free to take a picnic or a glass of wine to enjoy at this spot, but please be aware of golfers. Please respect other guests and stay as quiet as possible at the Hippo Hide, so that everyone can enjoy the beautiful sounds of nature.

HIPPO FACTS

- Hippopotamus [Hippopotamus amphibius]
- The name Hippopotamus comes from the Ancient Greek words for 'river horse'.
- An adult Hippo needs to resurface every 3 – 5mins to breathe. The process of surfacing and breathing is automatic, hence sleeping hippos will rise to the surface to breathe without waking up.
- Hippos have webbed feet.
- The hippopotamus is semi-aquatic, inhabiting rivers and lakes. The school will remain in the water and mud throughout the day to keep cool. At dusk they will emerge to graze on grass.
- They may be hefty (weighing in between 2,000 and 3,600 kilograms), but hippos are agile. If threatened on land, hippos will run for the water and can reach speeds of up to 30km/h in short bursts.
- Each female (called a cow) has only one calf every two years. Gestation lasts eight months.
- Soon after birth, mother and young join pods that provide some protection against crocodiles, lions, and hyenas. Dominant male hippos (called bulls) look after schools of between 10 and 40 other hippos (both male and female).
- The hippo's closest living relatives in the animal world are cetaceans such as whales and porpoises.

HELICOPTER LANDING PAD

There is no heli-pad at Kruger Park Lodge. Arrangements can be made to land at Hippo Hollow or the Hazyview Airstrip (near Numbi Hotel) by prior arrangement. Please contact Hippo Hollow direct (013 737 7752), or the ATC in Nelspruit at KMI (013 753 7519), for confirmation of landing coordinates and authorisation.

We suggest that you consult your GP to discuss the best options to suit your specific circumstances. A good mosquito repellent is also recommended, especially during the evening.

MONKEYS

Please ensure that your windows are securely closed when you leave your chalet.

OWL REHABILITATION PROJECT

TAKING CONSERVATION UNDER OUR WING

Owls are the silent hunters of our night skies. This superb, nocturnal raptor is the ultimate predator sounding a death knell for pest rodents.

In winter 2017, the General Manager of Kruger Park Lodge, Andre Eden, in conjunction with Skova Biodiversity, initiated an owl conservation programme on the Resort. This project is to assist owls that have recovered from injury; as well as orphaned owlets which have become adults; to return to the wild. Two aviaries have been erected and hidden in the green belt on the Resort. The owls are soft-released into these aviaries while they become acclimatised to their new environment. During this phase they are monitored to see if they are physically fit and able to hunt effectively for prey.

The Kruger Park Lodge staff participates in the project by ensuring the owls in the aviaries are fed and their enclosures cleaned daily. The staff do not interact with the owls in any way so as to ensure that they remain wild and do not become accustomed to human interaction prior to their release.

The first owls were released in 2017. Before they are released, a registered ringer places rings (SAFRING) onto the owls. A database has been compiled for Kruger Park Lodge which includes the ring number of each owl, date of release, weight, wing span and several other measurements.

Ringling the owls is of great value as the following incident clearly illustrates; on 15 January 2018, a male African Wood Owl was released at Kruger Park Lodge; in October 2018 Skova Biodiversity received a call about an injured owl located about 4 kms from the Resort. When the owl was collected it had a ring on it which identified it as the Wood Owl originally released.

The owl had collided with a vehicle and his muscle bundle under one of his wings was torn. The owl was taken to a vet who treated the owl for a period of 2 months after which it fully recovered. Coincidentally, during the owl's stay at the vet, a female Wood Owl also arrived for treatment - the two were placed together during the rehabilitation period and this resulted in the two owls pairing. They were subsequently released back to the wild and the pair is still frequently spotted in the area. Ringling the male Wood Owl provided us with information that the owl had successfully survived after release and that it had established its own territory.

To date, four different species have been released; the African Wood Owl (*strix woodfordii*), the Southern White-faced Scops Owl (*otus leucotis*), the Spotted Eagle Owl (*bubo africanus*) and the Barn Owl (*tyto alba*).

Kruger Park Lodge has taken conservation under its wing and is making a significant contribution towards the conservation of owls for future generations.

OWL SHOW EVERY SATURDAY

Together with the release-programme, Skova Biodiversity takes the opportunity to present owl talks at the Resort. These take place every Saturday morning at 10h00 (the venue is confirmed on a weekly basis – please check the activities board or ask Reception)

Live owls are brought in and guests get the opportunity to experience just how fascinating this nocturnal raptor species is. The talks are suitable for both adults and children.

A small fee is charged to attend these talks; this assists with the funding of the DNA gender-testing and feeding of the owls to be released.

PARKING

Please park your vehicle/s in the demarcated parking areas i.e. in your chalet driveway. Please do not park on the lawn or pavements as this will damage our underground irrigation system. Caravans are to be parked in the main parking area at Reception. Please avoid parking in areas where golf balls may travel, as we cannot be held liable for any damage to vehicles.

PETS

No pets are allowed on the premises under any circumstances. Should a pet be found, the owner will be asked to remove the animal or leave the property.

PLAYGROUND

A children's playground is situated adjacent to the tennis courts. Parents, please do not leave small children unattended. Kindly note that all playground facilities are used at your own risk.

POOL TABLE

Pool cues, balls, chalk & triangle can be hired at Reception, at an hourly rate. Our pool table is located in the Entertainment Centre, in front of the tennis courts.

Descend 51m down the gorge face, into the lush forest floor below, then walk along a spectacular 600m indigenous forest trail comprising wooden walkways, suspension bridges and interactive exhibits. The Lift Café has a lovely menu and the bar sells craft beers overlooking the breath-taking gorge. Craft and curio shops stock a good selection of locally made items. The Gorge Lift is situated just before Graskop, on the R533 (on the opposite side of the gorge to the Big Swing).

Experience one of the world's most expansive wildlife sanctuaries! Home to the Big Five, The Kruger spans over three provinces of South Africa. With an area of 19,633 km² the park stretches over 352km, from the Limpopo River in the north to the Crocodile River in the south, with a berth of up to 60km from east to west. The Phabeni Gate offers access into the Southern Kruger region, which covers about one-fifth of the total area, marked by granite koppies (outcrops) and plains of the Sabie River.
