## ECHIQUIER ARTIFICIAL INTELLIGENCE - B Share (ISIN: LU1819480192)

### Subfund of the Echiquier Fund mutual fund (SICAV) managed by La Financière de l'Echiquier

#### Investment objectives and investment policy

Echiquier Artificial Intelligence is a dynamic sub-fund seeking long-term performance via exposure to growth stocks in international markets. In particular, the sub-fund seeks to invest in securities that develop Artificial Intelligence and/or stocks that benefit from it.

The sub-fund's objective is to outperform its benchmark, MSCI World Index, net of management fees, over the recommended investment period. However, the sub-fund does not aim to replicate the benchmark's performance, as the portfolio's composition may differ significantly from that of the benchmark.

The UCITS implements active and discretionary management based on a rigorous bottom-up stock-picking process. The purchase and sale prices are determined for each equity selected based on a medium-term valuation. Consequently, some cases are subject to a very selective process based on quantitative and qualitative analysis. The sub-fund manager may also engage in trading activities with the aim of taking advantage of short-term market fluctuations.

The investment strategy aims to select stocks that participate in the development of Artificial Intelligence or those that benefit from the adoption of these technologies. The strategy will also include stocks whose activity is indirectly linked to the Artificial Intelligence sector (ecosystem, infrastructure, etc.). Depending on the manager's convictions, the portfolio's construction can lead to a concentrated portfolio (fewer than 50 stocks).

The sub-fund has a minimum exposure of 60% to equity markets of eurozone and emerging countries. Equity market exposure from emerging countries shall be limited to 30% of net assets. The sub-fund will be exposed to companies of all capitalisation sizes.

The sub-fund reserves the right to invest 40% maximum in interest rate products. At the time of acquisition and for monitoring purposes over the life of the securities, credit risk is assessed on the basis of in-house

research and analysis by La Financière de l'Echiquier and using the ratings produced by agencies. The eligible securities in question are deemed to be investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Forward financial instruments, whether or not they are traded on regulated markets or over the counter, can be used on an exceptional basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;
- Occasionally expose the portfolio to equity risk during significant subscription transactions. The fund does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

**Recommended investment duration:** This Fund may not be suitable for investors who plan to withdraw their money within 5 years.

**Allocation of income:** Accumulation.

**Deadline for centralising subscription/redemption orders:** Investors can make a request for redemption every business day. Redemption requests are centralised each market trading day before 10 p.m. (Paris time) with our centraliser BNP Paribas Securities Services Luxembourg and executed on the net asset value calculated on the closing price on the day they are centralised.

**Frequency of valuation:** The net asset value is calculated daily, except for days when the Luxembourg stock market is closed and on official Luxembourg public holidays.
