## DAPS Alcoholic Drinks

The LGC DAPS Alcoholic Drinks scheme covers a wide range of products including distilled spirits, wine, ciders and prepared lifestyle drinks, such as ready-to-drink cocktails and fruit based beverages.

Whilst alcohol content is an important analysis for duty payment purposes, there are many other analytes that influence the flavour of the product.

Consistent analytical performance in the laboratory, supported by participation in the LGC Proficiency Testing scheme, can help ensure the consistency of the product, keeping customers loyal to their favourite drinks.
