

# Pharmacopoeial reference standards and their current lot numbers

EP, EPISA, ICRS, BP

February 2019

Follow LGC Mikromol  
on LinkedIn

The background of the entire page is a top-down view of several glass petri dishes containing different types of pharmaceuticals. In the top left, there are red capsules. In the top center, a dish contains white oval tablets. In the top right, a dish is filled with many small, round, orange tablets. In the bottom center, a dish contains several light pink oval tablets. In the bottom right, a dish contains several red and white capsules. The dishes are arranged on a light blue surface.

Dear user,

This catalogue includes all pharmacopoeial reference materials from EP, EPISA, ICRS and BP available at LGC, as well as their current lot numbers. We update the catalogue on a monthly basis so that you can use the lot numbers to easily track the expiry dates of your stocked reference materials.

We took the lot information from actual data from the Pharmacopoeias, correct at the time of production. We retained all spelling and information as provided by the Pharmacopoeias. The list was compiled with caution, however errors in this list may be possible, and LGC is not responsible for any consequences as a result of these errors, may it be errors in the original Pharmacopoeia data, or from LGC during compilation of this list.

For any questions or orders please contact your local LGC office. You will find all contact details on the last page of this list. Alternatively, you can browse and buy pharmaceutical reference materials online at [lgcstandards.com/mikromol](http://lgcstandards.com/mikromol).
