

Tork Advanced Hand Towel Roll Green

artikel: 290076

systeem: H1 - Handdoek rol systeem

Lagen: 2

Kleur: Groen

Print: nee

Reliëf: ja

Rolbreedte: 21 cm

Rollengte: 150 m

Roldiameter: 19 cm

Binnenste diameter van kern: 3.8 cm

producteigenschappen

- Zacht en sterk papier
- Absorberend: droogt snel en grondig
- Hoge capaciteit: geschikt voor plaatsen waar veel gebruik plaatsvindt
- Groene kleur: voor gebruik in voedingsindustrie

verzendinggegevens

consumentenunit:

EAN: 7310791195476

stuks: 1

materiaal: Banderole

hoogte: 210 mm

breedte: 190 mm

lengte: 190 mm

volume: 7.6 dm³

nettogewicht: 1512 g

brutogewicht: 1528 g

transportunit:

EAN: 7310791195483

stuks: 6

consumentenunits: 6

materiaal: Carton

hoogte: 247 mm

breedte: 388 mm

lengte: 588 mm

volume: 56.4 dm³

nettogewicht: 9.07 kg

brutogewicht: 9.82 kg

Content

Recycled fibres, Chemicals

Material

Recycled fibres Recovered paper can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of

fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent Dry strength agent Dye=if coloured Fixing agents Fluorescent whitening agent Glue=if used The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes Environmental label = Ecolabel This product is approved for Blue Angel and Nordic Swan.

Date of issue 2007-11-06

Revision date 2009-07-23

Production

This product is produced at Kostheim mill, Germany, and certified according to ISO 9001:2000, ISO 14001 and EMAS.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste.
