Microwave oven

EN

*Product images are for illustration purpose only. Actual product may vary.

**Attention:**

Your product is marked with this symbol. It means that used electrical and electronic products should not be mixed with general household waste. There is a separate collection system for these products.

<https://sharphome.eu/contact/>

<https://sharphome.eu/support/>

<https://sharphome.eu/documents-of-conformity/>

A. Information on Disposal for Users (private households)

1. In the European Union

Attention: If you want to dispose of this equipment, please do not use the ordinary dustbin!

Used electrical and electronic equipment must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of used electrical and electronic equipment.

Following the implementation by member states, private households within the EU states may return their used electrical and electronic equipment to designated collection facilities free of charge*.

In some countries* your local retailer may also take back your old product free of charge if you purchase a similar new one.

*) Please contact your local authority for further details.

If your used electrical or electronic equipment has batteries or accumulators, please dispose of these separately beforehand according to local requirements. By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other Countries outside the EU

If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.

For Switzerland: Used electrical or electronic equipment can be returned free of charge to the dealer, even if you don't purchase a new product.

Further collection facilities are listed on the homepage of www.swico.ch or www.sens.ch.

B. Information on Disposal for Business Users

1. In the European Union

If the product is used for business purposes and you want to discard it:

Please contact your SHARP dealer who will inform you about the take-back of the product. You might be charged for the costs arising from take-back and recycling. Small products (and small amounts) might be taken back by your local collection facilities.

For Spain: Please contact the established collection system or your local authority for take-back of your used products.

2. In other Countries outside the EU

If you wish to discard of this product, please contact your local authorities and ask for the correct method of disposal.

For service, please refer to <https://sharphome.eu/contact/>, for your warranty rights go to <https://sharphome.eu/support/> or contact the retailer where you purchased your product.

Declarations of conformity are available from <https://sharphome.eu/documents-of-conformity/>.

CONTROL PANEL

- DIGITAL DISPLAY** – Cooking time, power, indicators and clock time are displayed.
- AUTO MENU keys** – Press to select auto cooking menu.
- START/QUICK START**
- MICROWAVE POWER** – Press to select microwave power level.
- GRILL** – Press to set grill cooking program.
- MICROWAVE+GRILL** – Press to set microwave and grill combination cooking program.
- CONVECTION TEMPERATURE** – Press to select convection temperature.
- MICROWAVE+CONVECTION** – Press to select convection combination cooking.
- JOG DIAL** – Use to set time of cooking or the clock.
- STOP/ECO** – Press once to temporarily stop cooking, or twice to cancel cooking altogether. Use to set power saving mode.
- CHILD LOCK**
- TIME/SET CLOCK** – Use to set clock time. Use to set timer function.

OVEN AND ACCESSORIES

- Door safety lock system
 - Oven window
 - Control Panel
 - Display
 - Oven cavity
 - Waveguide Cover (Do Not remove)
 - Glass Tray
 - Roller Ring
 - Turntable Coupling
 - Baking Tray
 - Grill Rack
 - Ventilation openings
 - Outer cabinet
 - Power supply cord
- The Grill Rack and Baking Tray are designed for use with grill and convection ovens only. DO NOT use any metal accessories when using the microwave function.

SETTING THE CLOCK

- In standby mode, press and hold **TIME/SET CLOCK** button for at least 3 seconds to enter the clock setting mode.
- Press the **TIME/SET CLOCK** button to select the 12- or 24-hour clock mode.
- Use the **JOG DIAL** buttons to set the desired hours and minutes.
- Press the **TIME/SET CLOCK** button to store and exit the clock setting mode.

MICROWAVE COOKING

1. In standby mode, press the **MICROWAVE POWER** button to select power level. Each time this button is pressed, the display will show the microwave power level.
2. Once the desired microwave power level has been selected, use the **JOG DIAL** buttons to select the time to cook.
3. Press the **START/QUICK START** button to start cooking.
4. When the cooking cycle is completed, the display will show "**End**" and a tone will be heard every two minutes until a button is pressed or the door is opened.

QUICK START

If you need to cook at 100% power level, just press the **START/QUICK START** button while in the standby mode. Each time the **START/QUICK START** button is pressed, it will add 30 seconds to the cooking time.

GRILL COOKING

1. In standby mode, press the **GRILL** button to select the grill function. The display will show "**Grl**".
2. Use the **JOG DIAL** buttons to select the time to cook.
3. Press the **START/QUICK START** button to start cooking.
4. When the cooking cycle is completed, the display will show "**End**" and a tone will be heard every 2 minutes until a button is pressed or the door is opened.

MICROWAVE + GRILL

1. In standby mode, press **MICROWAVE + GRILL** pad once or twice to select "Co-1" or "Co-2".
2. Use the **JOG DIAL** buttons to set cooking time.
3. Press **START/QUICK START** button to start.
4. When the cooking cycle is completed, the display will show "**End**" and a tone will be heard every two minutes until a button is pressed or the door is opened.

CONVECTION

Your oven can be programmed to combine preheating and convection cooking operations.

1. In standby mode, press **CONVECTION** button repeatedly to select convection temperature.
2. Press **START/QUICK START** button to start the preheat function.
3. When the designated temperature is reached, the oven will bleep.

Once the oven has preheated and the bleep sounds:

1. Open the door and place container of food at the center of the turntable.
2. Use the **JOG DIAL** buttons to set cooking time. The longest time is 95 minutes.
3. Press **START/QUICK START** button to start.

MICROWAVE + CONVECTION

1. In standby mode, press **MICROWAVE+CONVECTION** repeatedly to select temperature (210°C, 170°C, 140°C, 110°C).
2. Press the **JOG DIAL** buttons to set cooking time. The time ranges from 10 seconds to 95 minutes.
3. Press **START/QUICK START** button to start.

A full version of the User Manual can be found on the Sharp website.

YC-PC254A, YC-PC284A

<https://sharpohome.eu/>

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO MICROWAVE ENERGY

1. Do not attempt to operate this oven with the door open as this can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
2. Do not insert anything between the oven front face and the door or allow debris or cleaner residue to accumulate on sealing surfaces.
3. Do not operate the oven if it is damaged. It is very important that the oven door closes properly and that there is no damage to the door, hinges, latches or door seals and sealing surfaces.
4. Do not attempt to repair or adjust the oven.

IMPORTANT SAFETY INSTRUCTIONS

READ CAREFULLY AND KEEP FOR FUTURE REFERENCE

To avoid the danger of fire. The microwave oven should not be left unattended during operation. Power levels that are too high, or cooking times that are too long, may overheat foods resulting in a fire.

This oven is designed to be used on a countertop only. It is not designed to be built into a kitchen unit. Do not place the oven in a cabinet. The electrical outlet must be readily accessible so that the unit can be unplugged easily in an emergency.

The AC power supply must be 230-240 V, 50 Hz, with a minimum 10 A distribution line fuse, or a minimum 10A distribution circuit breaker. A separate circuit serving only this appliance should be provided.

Do not place the oven in areas where heat is generated. For example, close to a conventional oven. Do not install the oven in an area of high humidity or where moisture may collect. Do not store or use the oven outdoors.

If smoke is observed, switch off or unplug the oven and keep the door closed in order to stifle any flames.

Use only microwave-safe containers and utensils. Utensils should be checked to ensure that they are suitable for use in microwave ovens.

When heating food in plastic or paper containers, keep an eye on the oven due to the possibility of ignition.

Clean the waveguide cover and the oven cavity. These must be dry and free from grease. Built up grease may overheat and begin to smoke or catch fire.

Do not place flammable materials near the oven or ventilation openings. Do not block the ventilation openings.

Remove all metallic seals, wire twists, etc., from food and food packages. Arcing on metallic surfaces may cause a fire.

Do not use the microwave oven to heat oil for deep frying. The temperature cannot be controlled and the oil may catch fire.

To make popcorn, use only special microwave popcorn makers.

Do not store food or any other items inside the oven.

Check the settings after you start the oven to ensure the oven is operating as desired.

Do not leave the oven unattended while it is operating.

To avoid overheating and fire, special care must be taken when cooking or reheating foods with a high sugar or fat content, for example, Sausage rolls, Pies or Christmas pudding. See the corresponding hints in the user manual.

To avoid the possibility of injury. WARNING:

Do not operate the oven if it is damaged or malfunctioning. Check the following before use:

- a) Make sure the door closes properly and ensure it is not misaligned or warped.
- b) Check to make sure the hinges and safety door latches are not broken or loose.
- c) Ensure that the door seals and sealing surfaces have not been damaged.
- d) Make sure inside the oven cavity or on the door are no dents.
- e) Ensure that the power supply cord and plug are not damaged.

If the door or door seals are damaged, the oven must not be operated until it has been repaired by a competent person.

Never adjust, repair or modify the oven yourself. It is hazardous for anyone other than a competent person to carry out any service or repair operation which involves the removal of a cover which gives protection against exposure to microwave energy.

Do not operate the oven with the door open or alter the door safety latches in any way. Do not operate the oven if there is an object between the door seals and sealing surfaces.

Do not allow grease or dirt to build up on the door seals and adjacent parts. Clean the oven at regular intervals and remove any food deposits.

Follow the instructions for “Care and Cleaning”. Failure to maintain the oven in a clean condition could lead to a deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

Individuals with PACEMAKERS should check with their doctor or the manufacturer of the pacemaker for precautions regarding microwave ovens.

To avoid the possibility of electric shock.

- Under no circumstances should you remove the outer cabinet.
- Never spill or insert any objects into the door lock openings or ventilation openings. In the event of a spill, turn off and unplug the oven immediately, and call an authorised SHARP service agent.
- Do not immerse the power supply cord or plug in water or any other liquid.
- Do not let the power supply cord hang over the edge of a table or work surface.

- Keep the power supply cord away from heated surfaces, including the rear of the oven.
- Keep the appliance and its cord out of reach of children less than 8 years.
- Do not attempt to replace the oven lamp yourself or allow anyone who is not an electrician authorised by SHARP to do so. If the oven lamp fails, please consult your dealer or an authorised SHARP service agent.
- If the power supply cord is damaged, it must be replaced by an authorised SHARP service agent.

WARNING: Liquids and other foods must not be heated in sealed containers since they are liable to explode. Microwave heating of beverages can result in delayed eruptive boiling; therefore, care must be taken when handling the container. To avoid the possibility of explosion and sudden boiling:

Never use sealed containers. Remove seals and lids before use. Sealed containers can explode due to a build-up of pressure even after the oven has been turned off. Take care when microwaving liquids. Use a wide mouthed container to allow bubbles to escape.

Never heat liquids in narrow necked containers such as baby bottles, as this may result in the contents erupting from the container when heated and cause burns.

To prevent sudden eruption of boiling liquid and possible scalding:

1. Do not use excessive amount of time.
2. Stir liquid prior to heating/reheating.
3. It is advisable to insert a glass rod or similar (not metal) into the liquid whilst reheating.
4. Let liquid stand for at least 20 seconds in the oven at the

end of cooking time to prevent delayed eruptive boiling.

Do not cook eggs in their shells, and whole hard-boiled eggs should not be heated in microwave ovens since they may explode even after microwave cooking has ended. To cook or reheat eggs which have not been scrambled or mixed, pierce the yolks and the whites. Shell and slice hard boiled eggs before reheating them in the microwave oven.

Pierce the skin of such foods as potatoes, sausages and fruit before cooking, or they may explode.

WARNING: The contents of feeding bottles and baby food jars must be stirred or shaken and the temperature checked before consumption, in order to avoid burns. Use pot holders or oven gloves when removing food from the oven to prevent burns. To avoid the possibility of burns:

- Always open containers, popcorn makers, oven cooking bags, etc., away from the face and hands to avoid steam burns and eruption of boiling. To avoid burns, always test food temperature and stir before serving and pay special attention to the temperature of food and drink given to babies, children or the elderly. Accessible parts may become hot during use. Young children should be kept away.
- Temperature of the container is not a true indication of the temperature of the food or drink; always check the food temperature.
- Always stand back from the oven door when opening it to avoid burns from escaping steam and heat.
- Slice stuffed baked foods after heating to release steam and avoid burns.
- Keep children away from the door to prevent them burning themselves.

WARNING: Only allow children aged from 8 years and above to use the oven without supervision when adequate

instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use.

When the appliance is operated in the GRILL, MIX GRILL, CONVECTION, MIX CONVECTION and AUTO MENU mode (mode applicable to model), children should only use the oven under adult supervision due to the temperature generated.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance. Cleaning by children should be monitored.

Models with Electronic touch panel are enabled with a child lock mode.

Do not lean or swing on the oven door. Do not play with the oven or use it as a toy.

Children should be taught all important safety instructions: use of pot holders, careful removal of food coverings - paying special attention to packaging (e.g., self-heating materials) designed to make food crisp, as they may be extra hot.

Other warnings

Never modify the oven in any way.

Do not move the oven while it is in operation.

This appliance is intended to be used in household. This oven is for home food preparation and may only be used for cooking food and beverages. Drying of food or clothing and heating

of warming pads, slippers, sponges, damp cloth and similar may lead to risk of injury, ignition or fire. It is not suitable for commercial or laboratory use.

To promote trouble-free use of your oven and avoid damage.

Never operate the oven when it is empty. When using a browning dish or self-heating material, always place a heat-resistant insulator such as a porcelain plate under it to prevent damage to the oven base due to heat stress. The preheating time specified in the dish's instructions must not be exceeded.

Do not use metal utensils, which reflect microwaves and may cause electrical arcing. Do not put cans in the oven.

To prevent the turntable or base of the oven breaking:

- a) Before cleaning with water, leave to cool.
- b) Do not put hot or cold foods or hot utensils on a cold turntable/oven base.
- c) Do not place anything on the outer cabinet during operation.

NOTE:

Do not use plastic containers for microwaving if the oven is still hot from using a combination mode (oven model dependant) because they may melt.

Plastic containers must not be used during above modes unless the container manufacturer says they are suitable.

If you are unsure how to connect your oven, please consult an authorised, qualified electrician.

Neither the manufacturer nor the dealer can accept any liability for damage to the oven or personal injury resulting from failure to observe the correct electrical connection procedure.

Water vapour or drops may occasionally form on the oven walls or around the door seals and sealing surfaces. This is a normal

occurrence and is not an indication of microwave leakage or a malfunction.

This appliance is intended for use in household and similar applications such as; Kitchen areas reserved for staff in stores, offices and other professional environments / Farms / Use by clients of hotels, motels and other residential type environments / Bed and breakfast type environments.

This symbol means that the surfaces are liable to get hot during use.

INSTALLATION

1. Remove all packing materials from the inside of the oven cavity and remove any protective film found on the microwave oven cabinet surface.
 2. Check the oven carefully for any signs of damage.
 3. Place the oven on a secure, level surface, strong enough to take the oven weight, plus the heaviest item likely to be cooked in the oven. Do not place the oven in a cabinet.
 4. Select a level surface that provide enough open space for the intake and/or outlet vents. See picture on the first page. The rear surface of appliance can be placed against a wall.
- The minimum installation height is 85 cm.
 - A minimum space of 20 cm is required between the sides of the microwave oven and any adjacent walls or objects.
 - Leave a minimum space of 30 cm above the oven.
 - Do not remove the feet from the bottom of the oven.
 - Blocking the intake and/or outlet openings can damage the oven.
 - Place the oven as far away from radios and TV as possible. Operation of microwave oven may cause interference to your radio or TV reception.

5. Securely connect the plug of the oven to a standard earthed (grounded) household electrical outlet.

WARNING:

Do not place the oven where heat, moisture or high humidity are generated, (for example, near or above a conventional oven) or near combustible materials (for example, curtains).

Do not block or obstruct air vent openings.

Do not place objects on top of the oven.

Do not touch the exterior of the microwave oven during or shortly after operation as it will be hot.
