Built-in model	

<sup>1)</sup> The "standard 60°C cotton" at full and partial load and the "standard 40°C cotton" at partial load are the standard washing programmes to which the information in the label and the fiche relates. Standard 60°C cotton and standard 40°C cotton are suitable to clean normally soiled cotton laundry and are the most efficient programmes in terms of combined energy and water consumption. Partial load is half the rated load.

<sup>2)</sup> Based on 220 standard washing cycles for cotton programmes at 60°C and 40°C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used.

<sup>3)</sup> Based on 220 standard washing cycles for cotton programmes at 60°C and 40°C at full and partial load. Actual water consumption will depend on how the appliance is used.

<sup>4)</sup> For the standard 60 °C at full and partial load or the 40°C at partial whichever is lower.

<sup>5)</sup> Attained for 60 °C cotton at full and partial load or the 40°C at partial whichever is higher.

<sup>6)</sup> Based on washing and spinning phases for the standard 60°C cotton programme at full load.
