

Borosilicate glass

Tempered borosilicate glass, the best glass for oven safe cooking.

Thermal shock resistant : 220°C

Straight from the oven to the table... from the table to the refrigerator... from the refrigerator to the oven...

The 2 secrets of tempered borosilicate glass :

- A key ingredient added to the glass mix : **BORON**
- After forming, the glass is subjected to immediate cooling to compress its surface : it's called **TEMPERING**

Tempered borosilicate glass complies with EU standard EN 1183 and with a thermal shock resistance higher than 180°C.

Pyrex is the best of tempered borosilicate.
