With his focus on the digital transformation and new business models, Ulrich Hermann has a strong track record as CEO and board member from various industries. As Member of the Board of Next.e.GO Mobile SE, Ulrich Hermann joins the company in a phase in which the battery vehicle manufacturer e.GO Mobile is evolving from a pioneering company to a growth company. While the established automotive industry is caught up in transformation projects almost worldwide, in which structures from its current production and product centricity are to be redesigned, Ulrich Hermann, can fully dedicate the management team to the requirements of a digital user-centric business. As a proven expert in the field of digital sales channels as well as in the software and service business, Ulrich Hermann thus complements an excellent team that, as a spin-off of the RWTH Aachen University, has set out to redesign the mobility of the digital future with cutting-edge technology.

Prior to this, the proven digitization expert Ulrich Hermann was a member of the Management Board of Heidelberger Druckmaschinen AG and responsible for the digital transformation of the global mechanical engineering group. He also headed global sales, the Digital Business, Software and Services division at Heidelberg. As CEO of Wolters Kluwer in Germany and Central Europe, he was also involved in building up the digital business. During his ten-year tenure, the Group has transformed itself from a traditional publishing house to a pure digital systems provider for information solutions. Previously, Ulrich Hermann held CEO positions at Süddeutscher Verlag and Bertelsmann AG. He studied mechanical engineering at the RWTH Aachen and at the M.I.T., Cambridge, received his doctorate in business administration in St. Gallen in 1996 and is now honorary professor at the University of Allensbach, currently with courses on digital business transformation.
