Lowrance® is pleased to announce the release of new software for Elite HDI, Elite CHIRP, HOOK and Trophy units.

This update is designed to improve mapping/chart redraw speeds when using the map at tighter zoom ranges, while driving the boat at speed.

Benefits include:

- Improved user experience; changes have been made in the way charts are loaded and stored in memory
- With this upgrade, the issue causing customer complaints about the vessel icon “running off of the chart image” has been corrected, resulting in much better low zoom range (less than 1 mi. zoom scale) performance at higher vessel speeds
- Corrected issue with Navionics® mapping discovered in Elite 6.0.7.0.8 _ HOOK/Trophy 2.0.7.0.8 software.
