

### KA1400 Fitting Guide

	<p>First of all untighten the locking tab slightly, then push it up, for this you need, 1x Philips screw driver, 1x 8mm spanner.</p>
	<p>Then place one side of the KA1400 between the ratchet and locking tab.</p>
	<p>Then fully insert so the KA1400 is resting on the leg.</p>
	<p>Then place the other side of the KA1400 over the nut so the holes line up as shown.</p>

	<p><b>Then tighten up with the 4 screws provided, for this you need 1x Philips screw driver</b></p>
	<p><b>To vary the resistance rotate the tightening knob clockwise or anti-clockwise,</b></p>
