**TECHNICAL SPECIFICATIONS**

Overall height: 88cm (34.6")

Tube Diameter: 26mm

112

**USEAGE REQUIRMENTS**

1. We strongly recommend that all flanges are level with the fixing surface which must be solid. Extreme caution is required where studded plasterboard / chipboard surfaces are evident and the correct proprietary fixings must be used at all times.
2. Ensure that the moveable head flange is parallel to the wooden rail before securely fixing the screws into the wooden rail.
3. Periodically check to ensure that flanges are secures at all times.
4. Clean the product with neutral detergent and warn water. Disinfect with chloride disinfectant – rinse and dry if necessary.
