July 2019

Dear Parent

As part of our continued emphasis on challenge and developing resilience for all our young learners, we have devised a number of Summer Challenge projects for our current Year 7 and Year 8 students. The aim is for your son/daughter to choose the areas they are interested in and complete projects over the six week summer holiday. The projects have been designed so anyone can get involved. It is hoped they will keep your son/daughter engaged in and enthused by learning, ready for the next school year. There is no limit or maximum in terms of completion. There is also no prescribed way in which the students are being asked to do the projects. We hope the freedom given will further develop their independence and stimulate their curiosity.

Students can bring in their completed projects in September and these will then be shared and celebrated with their peers and teaching staff. There will be recognition and rewards for the best projects.

You can find the projects on our website – [www.woodkirkacademy.co.uk](http://www.woodkirkacademy.co.uk) – in the Student section. If you do not have internet access please telephone Reception on 0113 887 3600, by Friday 12 July, to request a paper copy of the project(s) your son/daughter is/are interested in.

If you have any further queries please do not hesitate to contact me.

Yours sincerely

L Coffey  
Vice Principal  
Teaching & Learning
