This Students' Union notes:

1. Internationalisation is defined as the process of bringing an international perspective to every aspect of the student experience.
2. Over 25 per cent of students at our University are international students.
3. In the modern job marketplace, having understanding of the world is viewed as a key skill.

This Students' Union believes:

1. Every student at our University should have access to an international experience that will enhance their social life, academia and career prospects
2. International students enrich the University through the diversity which they bring to Sheffield
3. Integration is the active process of students from different backgrounds educating each other about their cultures, thereby expanding their understanding, tolerance and appreciation of the world we live in

This Students' Union resolves:

1. To promote and deliver the ideal of internationalisation by implementing the SU strategic plan, especially the goals within Theme 3 – My Place in The World.
2. To continue to deliver international opportunities for students in collaboration with the International Students’ Officer and the International Students’ Committee
3. To ensure the University continues to put internationalisation at the heart of their future planning
4. To continue to promote and encourage integration within our student community

This policy is next due for review in November 2019.
