

*I am a positive and inspiring master student living a normal life like you guys do. Each day at uni/work trying to inspire people and spread positivity, I help my classmates to raise their horizon by asking positively powerful questions that inspire and point us toward a better future. I turn negativity into inspiring dreams for the future and then equip my team with the resources they need to get the job done. At home, I support my family through a belief in the best of who they are. I know my strengths, I seek the best for the university and I am eager to live out the future we've designed together.*
