WHAT DO I STAND FOR?

HOW WILL I CHANGE IT ?

Accountability

- Structured Timetables.
- Realistic examination time.
- Mandatory Lecture Captures.

Inclusivity

- Be Brexit ready for future international students.
- Financial help
- Scholarships

Transparency

-Education, and the decisions made around it, is in the public interest of the University's students.

Accountability

-Talk with the university to ensure the consistency of timetables and avoid overloading students in a day or have everything spread across the week too much.

-Try to prolong the examinations time people are given, where time is of the essence to write a full answer in order to achieve a good grade.

-Try to make Lecture Captures mandatory to more courses to ensure academic standard and quality and give students the opportunity to revise thoroughly.

Inclusivity

Brexit is on the way and Student Finance Loan has already announced that next year will be the last time anyone can get a loan. Thus, I want to ensure that the University has the right support in place for Financial Help and propose for more scholarships opportunities for future international students.

Transparency

Public Interest is the reason why students are entitled to information that is of importance and will impact them. Therefore I will ensure to inform everyone about my achievements through a podcast with my fellow officers.
