

HARRY NORTH

Societies and Development Officer (INSPIRE)

I am Harry and I am running for the Societies and Development Officer role. I am a final year Computer Games Technology student and I am also the current chair of the **Anime Society**. In terms of anime, my favourite series is **One Piece**. The reason why I am running for the Societies and Development Officer role is so that I can work alongside Societies to both improve the speed in which Societies receive information and so that I can help societies become more appealing to students that travel to University from the surrounding towns and areas such as **Oldham, Salford, Bolton and Rochdale**.

My main aims are to:

- Improve the **flow of information** to societies
- Introduce a **League Table** based around how active societies and what events they put on for their members as well as **collaborations** with other societies
- Create a **showcase event** ran by the different societies as a collective
- Build on the **bonds** that each society has made to improve the appeal of joining a society for **local and International** students

I believe that I am the ideal candidate for the role because I have an understanding on how participating in events and socials run by a society can be difficult for a student who **travel** to University from the **surrounding areas** as I myself have had to travel to University from **Oldham**. I want to use my experience to help **societies** work on scheduling events that may be seen as nearly impossible for students who have to travel into University. I want to push societies so that they are in the spotlight.
