How to Play

Sudoku

- Fill in the grid, ensuring each column, row, and every 3x3 box contains the numbers 1-9.

- A continuous external route navigates the 3 groups across one line, connecting all routes.

- The unique number in each box is to be placed in order to complete the grid.

- The solution must be achieved without using pencil or eraser.

- The final solution must be unique, with no other possible solutions.

- The puzzle is designed to improve concentration and logical thinking.

St Angela’s is one of a handful of schools in the country with a newly-opened sports hall.

The old convent building stands in harmony with the new school building at St Angela’s College in Cork.

The new school campus opened to students and staff on January 21, 2021, and won widespread praise from students and parents.

The RIAI has encouraged people to vote for their favourite building by June 17.

Today, there is fun in the design. Light fills the corridors, which are light and airy, and there are lovely social spaces.

Cork school’s renovation is a showcase for architectural excellence, writes Eoin English.

The architectural design has been hailed as a national award which is due to the coherent thinking of the building.

The new school campus opened to students and staff on January 21, 2021, and won widespread praise from students and parents.
