## Online Rock Salt Heavy Duty Spreader

www.onlinerocksalt.co.uk

## Salt Spreader Assembly Guide

### Tools required

- 10mm open ended spanner.
- 10mm ratchet spanner.
- 12mm open ended spanner
- 12mm ratchet spanner.

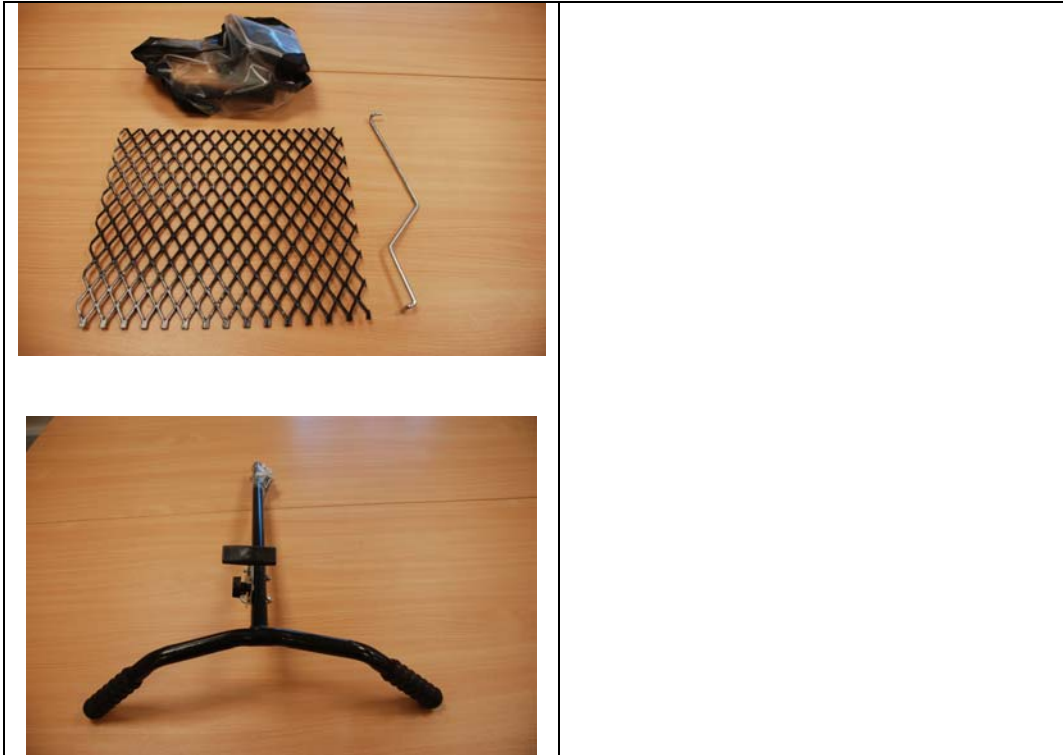

#### **Recommended**

Socket set (10mm and 12mm) with ratchet.

### In the box

- Salt spreader main body.
- Mesh.
- Linking bar.
- Weather proof cover.
- Handle (with attached flow control mechanism).

## Securing the handle

- Align the handle and the main body of the salt spreader.
- Secure the handle to the body using the 10mm bolts provided.

## Linking bar

- Attach the linking bar at both ends (this is easier if you undo the pivot link in the mechanism attached to the lower handle).

## Attach the handle control

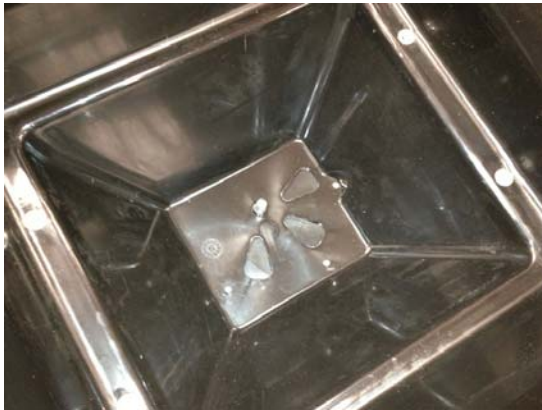

- Reattach the pivot (take care to ensure that all the washers are in the same order).
- Attach the bar from the upper part of the handle to the pivot (this uses a 12mm bolt).

## Adjusting the handle control + mesh

- The two nuts on the bar down from the main handle serve to adjust the mechanism.
- You should align them so that you can completely close the flaps at the bottom of the spreader.
- The mesh simply sits inside the hopper; place in as per the photo.

**Now you're ready to go!**
