

# Fairy Garden on a Plate

With Spring in the air why not get outside and create your very own fairy garden? If the weather is bad you can use playdough and other bits and bobs to invent your very own miniature world! Give it a go!

You will need:

- A paper plate
- Some soil, sand or playdough
- A spade or scoop
- Leaves, sticks, flowers, or anything else you can find!

Collect some flowers, leaves, moss and sticks, or anything else you can find. Don't forget a toy or two!

Scoop some soil on the paper plate.

Place your collected items carefully onto the soil. A small container like an old yoghurt pot or even a shell will make a perfect miniature pond!

Here are a couple we have made, now all we need are some fairies to come and play in them!
