

Shadow Drawings

Make your own drawings using the sunshine to help you!

You will need:

- A sunny day
- Plain white paper
- Small figures or toy animals
- Pens, pencils or paints for colouring in or painting

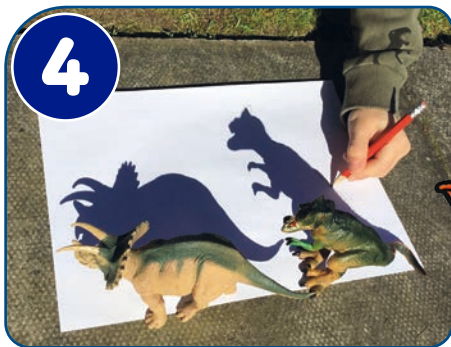

Find some small figures, they could be jungle animals, farm animals, whatever you have around. Place them so their shadow falls onto a sheet of paper.

It doesn't matter what the figures are, as long as their shadow is obvious. Here are a couple of prehistoric creatures!

We've decided to use some scary dinosaurs!

Carefully draw around the shadows. You might need to move around the picture and draw it from above so you can see the shadow.

Have lots of fun colouring in your drawing!

What will you create?
