

Hadley Biography

With his first release in 2017 with Drum & Bass heavyweight Turno on his award winning album the Power LP, Essex based Paul Wilkinson has quickly established himself as one of the producers to watch for the future. Since his first exposure to the scene with Turno Hadley embarked into refining his sound and self released his track 'Talking' which reached over 150k plays on Soundcloud, a remarkable achievement for a self release from a new artist and after which he released on labels such as Skankandbass, Overview, Rebel Music, Vandal, Lifestyle, Nurtured Beatz & Context Audio. Reaching the top 10 in the Drum & Bass Beatport chart with his highest ranking at number 5 with his track 'Who You Are' released on Overview Music.

Hadley has since gained support from the likes of Skeptical, Foreign Concept, Noisia, Phaction, Doc Scott, DJ Marky, Kanine and Hedex to name a few, had his tracks played regularly in festivals across Europe such as Boomtown and Hospitality and many venues around the world. This caught the attention of the legendary Teebee and since has made Hadley an integral part of the future of his label 'Subtitles' and brings an exciting next chapter being a part of a label with prestige and with Teebee planning to take the label to the level of many other successful rivals this is something that has come at the right time for Hadley with an opportunity to build something special alongside Teebee.

The future is exciting for Hadley with his own music studio based in Essex 'Studio 808' establishing itself as the go to studio in Essex with the aim to make sure Drum & Bass music is heard in his city and educating the youth to the sound and heritage of this UK sound which he is so passionate about. This has allowed him the freedom to take music on full time which has been shown in his recent output of tracks which have been making waves in the Drum & Bass scene with many artists and labels keen to hear what is coming next!
