

Ben Verse's career in electronic music started in the legendary underground parties of Renegade Hardware, V Recordings and Valve and took him to the heights of headlining main stages around the globe with Pendulum.

Having toured for the past 12 years as the front man for the live shows and DJ sets he has now decided to distance himself from Pendulum to pursue his own 'Ben Verse' brand.

Based out of his 'Black swan studios' in London where his label Crunch Recordings is based he plans to continue to MC and DJ, whilst also producing and releasing music.

With collaborations due for release before the summer alongside Prolix, Maztek, SP:MC, Icicle and Proxima his discography of over 70 releases continues to grow.

In 2018 Ben's position and influence in today's scene is undeniable and now in collaboration exclusively with 'Evolution artists' the next chapter awaits.
