

## **Covid 19, cleanliness and our ongoing commitment.**

The cleanliness of our vehicles has always been very important to us. We introduced strict cleaning measures back in March when it was clear that the Covid 19 virus meant that we had to change and adapt our policies accordingly.

Whilst things may have eased with regard to the lockdown our strict procedures will obviously be remaining in place and these are as follows.

Our vehicles are thoroughly cleaned between each and every rental with particular attention to the following.

Exterior ; Vehicles are now cleaned with a pre spray detergent followed by washing off with a pressure washer. This allows us to give the exterior a thorough clean before the next rental.

Interior ; The cleanliness of the interior of the vehicle has been subject to a thorough review in line with industry recommendations and whilst we still give the vehicle a complete vacuum through we also pay particular attention to the following items which are now sanitised with a disinfectant that meets leading health authority requirements.

Door handles both exterior and interior.

Steering wheel, steering column and controls.

Seat belts and seat belt stalks throughout the vehicle.

Handbrake lever, gear stick.

Dashboard including all high touch areas. ( Vents, controls, radio, centre console etc )

Door pockets, cup holders, door interiors.

All other high touch areas.

We also have measures in place to isolate any vehicle if necessary with the vehicle being quarantined for a minimum of 1 week before a deep clean followed by a further 72 hours quarantine

There are also free disposable gloves for all customers when collecting their vehicles should they require them.

We would like to confirm that the health and well being of all our customers and colleagues will remain our number 1 priority.

Thank you.
