

# FOODLUBE® PROTECT SPRAY

Performance you can trust

## CUSTOMER

An international food and ingredients company. This plant specialising in pork products.

## APPLICATION REQUIREMENTS

The company required a food grade corrosion inhibitor as they were experiencing severe corrosion on the fittings attached to the brine injector machines. This is due to the exposure to salt and resulted in the costly replacement of parts on a regular basis.

## BENEFITS

Since applying FOODLUBE Protect the company have noticed a significant reduction in the amount of fittings being replaced. Previously they replaced all fittings on the brine injectors every 4 weeks in order to maintain effective operation. They are now replacing fittings as required individually.

6 machines / 10 fittings per machine  
@ £5.00 per fitting:                      £3000 per annum

Current estimated fitting cost:      £1100 per annum

**This represents a cost saving of £1900 along with additional performance benefits.**

## FOODLUBE PROTECT SPRAY

High performance, long term corrosion protection for all metal parts.

- ▶ ISO 21469 certified
- ▶ Outdoor protection for up to 2 years
