

PRESS RELEASE
5 March 2019
London

Maistro relocates to Exeter Science Park

[Maistro Plc](#), the AI-powered procurement marketplace for services, today announces it has moved to Exeter Science Park.

The move will allow Maistro to continue to expand its team in 2019, following this year's appointment of Chief Commercial Officer, Neale Pritchard, and the 2018 appointment of Chief Financial Officer, Ian Cleverly. Recruitment in 2019 will continue to focus on building the company's business development and engineering teams.

Maistro's new offices will span across two floors in one of the newly constructed buildings in the park.

Laurence Cook, CEO at Maistro comments:

"It is fantastic to be part of a growing South West tech community. Exeter Science Park is the right venue for us to expand and build on the successes of 2018. Being within a like-minded tech community will be a huge asset for us. As we have seen from our involvement with Tech South West, the tech ecosystem is thriving in the region, with technology being the fastest growing sector. Our relocation to Exeter Science Park will facilitate collaboration with other tech companies that are already showcasing the innovation generated by companies throughout the region.

"Maistro has seen strong growth over the past 12 months and we're eager to accelerate this activity in our new home."

Dr Sally Basker, CEO of Exeter Science Park, said:

"We're pleased that Maistro has chosen to move to Exeter Science Park for their next phase of growth and we welcome them to our thriving business ecosystem. Exeter Science Park helps innovative companies to deliver extraordinary growth and we offer our tenants the space and support to allow them to do what they do best. This is the ideal location for Maistro to continue its upward trajectory and we wish them every success."

About Exeter Science Park

Exeter Science Park works collaboratively to facilitate the growth of innovative, fast-growing STEM businesses that exploit world-class research, create jobs, attract and retain talent, and drive productivity and economic growth. It is the result of a vision to develop a science park at Exeter in the south-west of the United Kingdom in order to stimulate a knowledge-based economy delivering better jobs, higher productivity and economic growth.

By 2035, over 3,500 people will work for companies with a combined turnover greater than £350M based at Exeter Science Park and over 2,500 of these will be new, high-quality jobs. Exeter Science Park membership scheme will have over 1,000 members comprising on-site tenants as well as offsite virtual tenants, STEM businesses and non-STEMM associates and over 7,500 new, high-quality jobs will have been created off-site.
