Supplementary data

Predicted Metabolic Pathway Distributions in Stool Bacteria in Very-Low-Birth-Weight Infants: Potential Relationships with NICU Faltered Growth

S6. PCA plots between VLBW infants and term infants by week. The PCA plots are made using the prcomp function in R. Each plot is based on the pathway abundances for the preterm and term infants for each week. They are 1) week1, 2) week2, 3) week3, 4) week4, 5) week5, and 6) week6
3) Week 3

4) Week 4
5) Week 5

6) Week 6
