

# Mosa.

Mosa tiles are high quality products that are designed and manufactured in the Netherlands and shipped worldwide. The products are manufactured in accordance with the European Standard EN 14411 and often exceed the specific requirements set by this standard.

## European building regulations

Mosa tiles are manufactured and tested in accordance with EN 14411 and meet the CE marking requirements outlined by the European Construction Products Regulation (CPR). Based on their intended use, declarations of performance have been drafted and made available for our indoor wall tiles and our indoor and outdoor floor tiles, containing information about their key properties.

## Additional approvals by country

### The Netherlands

Mosa Ultragres floor tiles are NL-BSB certified (Building Materials Decree) according to assessment guideline BRL52230 (certificate number IKB1578) This means, among other things, that Mosa Ultragres tiles comply with all the environmental specifications of the Dutch Soil Quality Decree and are also suitable for outdoor use, including on façades.

Mosa wall and floor tiles are KOMO certified (Organization for the Certification of Building Materials, certificate number IKB1466) according to BRL1010 and therefore comply with the higher standards for dimensional stability and flatness in terms of EN14411, appendix G. This means that Mosa tiles also comply with the standards set for the materials used according to URL35-101, chapter 4, for the purpose of obtaining the KOMO process certificate for the application of tiles (BRL1017).
