Costa Caribe Aquatic Park

PortAventura confirms this season one of its most expected projects: **the complete renovation and extension of the Costa Caribe Aquatic Park**, the second park of the resort, right next to PortAventura.

The **Costa Caribe Aquatic Park** project means an enlargement of 14.000 m² of new facilities, reaching that way the 50.000 m² total surface of the park. The extension has a €10 million budget and will open in May. The project is framed in the €75 million investment plan approved by **Investindustrial** in November 2012, with the goal of the expansion and adaptation of the resort to a public more and more international.

The aquatic park is a key part of the strategy, as it is proved by the fact that foreign visitors are more than 50% of the total aquatic park's visits (most English and Russian). In fact, a study done in Russia in 2012 evidenced that one the most important factors to choose PortAventura for eventual holidays is the fact of having an aquatic park.
