

NEW EDUCATIONAL PROGRAMME

PortAventura EcoEduca

For a more sustainable future

If you want to enrich your trip through the worlds of PortAventura Park, don't miss our new EcoEduca educational programme. It is a unique offering that combines learning and fun and takes our environmental commitment one step further. With this programme, we want to bring educational values to your PortAventura World visit and promote behaviours that encourage greater respect for the environment and a more sustainable future for everyone.

Two workshops:

BIODIVERSITY

ZERO WASTE

50-minute educational workshops

For primary and secondary school pupils

Advance booking: limited places

With fun and interactive activities

LEARNING, FUN...AND MUCH MORE!

The PortAventura educational programme complements the syllabus taught during the primary and secondary school years with practical and interactive workshops that make it easier for students to assimilate information. Workshops last 50 minutes and are delivered by experts in each of the areas explored.

Sustainable development is the main concept of EcoEduca's two educational workshops. In each one, key skills are developed in accordance with the academic curriculum and the areas in which the students can take action to help build a more sustainable society.

BIODIVERSITY WORKSHOP

You will take a deep dive into the concept of biodiversity and learn more about the origin, behaviour, and ecology of exotic birds from the Aves del Paraíso show at PortAventura Park from a unique point of view. A biologist who specialises in these fantastic creatures will show you live specimens and demonstrate some of their skills and fascinating characteristics.

In addition, it will teach the importance of protecting the diversity of species and conserving their natural habitats and, as if that were not enough, you will discover some of the ecosystems present in PortAventura Park.

ZERO WASTE WORKSHOP

This workshop is a space for reflection on the environmental impact caused by waste and how we can live without generating it. We will show you how we are eliminating single-use plastics at PortAventura World and you will learn about new materials and alternatives that we are testing to minimise the generation of waste.

In this workshop, you will also discover how to use materials in a sustainable manner to bring us closer to the circular economy: from obtaining raw materials and resources (renewable and non-renewable) to reducing waste, reusing materials and recycling.

BOOK ECOEDUCA AT NO ADDITIONAL COST!

Buy the tickets for your group and send an e-mail to ecoeduca@portaventura.es to add EcoEduca at no additional cost. We recommend that you book in advance as places are limited.
