Poster Presentation at IAQ 2012 Conference

Laura Roberts from PPM recently attended the IAQ 2012 Conference held at University College London.

The Indoor Air Quality conference is the 10th in the series of conferences dedicated to the research and knowledge exchange in the field of indoor air quality in historic and heritage environments in museums, galleries, archives, libraries and historic houses.

We presented a 'Poster Presentation' (see photo) at the event - titled 'Application of Wireless IAQ Monitor' which introduced our IAQ instruments and outlined benefits of continuously monitoring IAQ. If you would like to receive the 'Poster Presentation' document in PDF, please contact me gareth@ppm-technology.com

Indoor Air Quality is a significant issue in libraries, museums and archival collections - due mainly to the fact that many compounds, as well as unsuitable temperature and humidity has a deteriorating effect on many valuable and precious items stored in these buildings.

The design and construction of archive environments are unlike traditional buildings, in that they require the most stringent of interior environmental conditions for preservation. These conditions can sometimes create health problems for building occupants.

Many delegates were interested in our poster and products; over the next few weeks and months we are launching a campaign to promote our instruments to these types of buildings.

Service trip to Trespa International.

PPM representative's recently visited Trespa International BV in the Netherlands. Trespa International BV is a world leader in the development, manufacture and supply of high performance, high quality panels for exterior cladding, decorative facades and interior surfaces.

The purpose of the visit was to service and calibrate our numerous Formaldehyde monitoring instruments we have supplied to their manufacturing base. We also introduced them to our new instrument features and developments.

< 4 to 20 Milliamp output Formaldehyde monitoring instrument sampling the air inside Trespa facility.

Technical Training given to EcoTech Environmental employee.

PPM recently welcomed Kenneth Chan from EcoTech Environmental; they are one of Macao's leading companies in the environmental industry. We recently agreed a partnership with Ecotech to distribute our IAQ monitoring instruments in Macao.

During his 3-day stay we gave Kenneth some technical training relating to our instruments and software; this vital hands-on knowledge will be vital in promoting the instruments to the Macao environmental industry.

PPM at UK Fortronic Forum

PPM team members Huw and Tom who are involved in research and development work recently attended the UK Fortronic Forum held at the Williams F1 Centre in Oxfordshire. The subject of the Forum was 'RF and Wireless Design'.

Website - <http://www.fortronicuk.com/page.asp>

They attended a number of seminars and talks informing them of the latest technological developments in this field. The event was an opportunity to gain new ideas that could be adapted to our instruments.

The importance of Indoor Air Quality is moving up the EU agenda.

At the AGM of the European Ventilation Industry Association held on 11 – 12 June 2012 in Brussels, EVIA members decided to promote the importance of indoor air quality for health and comfort in an extended spectrum of policy and legislation such as Energy Performance of Buildings.
