

Issue 22

September 2012

End of financial year sees improvement in turnover figure.

PPM is pleased to report our turnover for the past 12 months has seen a slight increase.

We are very grateful to all distributors, customers and other associates who have been integral in contributing to this successful year.

Please see the below list of our 10 most active markets worldwide -

1. PR China
2. UK
3. USA
4. France
5. Taiwan
6. Australia
7. Netherlands
8. Spain
9. Singapore
10. Japan

We are hopeful of expanding our customer-base in these countries as well as seeing further development of markets in other regions.

We will continue our policy of continuous development and investing in developing new products and services. The majority of profit made will be re-invested back into the company for research and development.

PPM staff climbs to new level!

PPM staff members recently enjoyed a team-building exercise at a local indoor climbing centre. See photo –

The activity was held in concurrence with the temporary departure of our Production and Development Technician - Tom Hughes who has left PPM for the next year to travel around Europe.

Customer Satisfaction Survey

Our annual customer satisfaction survey has been sent to a number of our customers and distributors. The survey aims to give us an insight into our customers' opinions on our overall performance, as well in the following fields – Marketing, Staff and Service and Products. The survey's findings will be used to improve the company in any way we can.

If you would like to complete the survey please contact sales@ppm-technology.com

If you have any relevant stories, including any recent or upcoming exhibitions, application stories or customer testimonials that you want to be included in the next newsletter please feel free to contact us:

New article published in Museum and Heritage Magazine website - http://www.mandh-online.com/company/1669/ppm_technology_ltd

PPM conducts Intellectual Property (IP) Audit.

PPM recently held an 'IP Audit' - the audit reviewed all of the company's Intellectual Property rights including Trademarks, Copyright, Logo, Company name and website.

We have in the past come across instances of people/companies illegally using our 'Formaldemeter' trademark, if you have also come across this at some point we'd be interested in learning more. Please contact info@ppm-technology.com

Report: Healthy Environments – A list of substances linked to asthma.

The primary aim of the report was to develop a list of substances in the environment that are linked to asthma in an effort to improve awareness of the causes of the disease and inform decision-making in the design and construction of buildings and the specification of building products.
