JBoss for the developer

Pete Muir
Principal Software Engineer, JBoss
April 2012

SESSION OBJECTIVE

By the end of this session you will know how to build a modern, mobile ready application using HTML5 and Java EE 6.
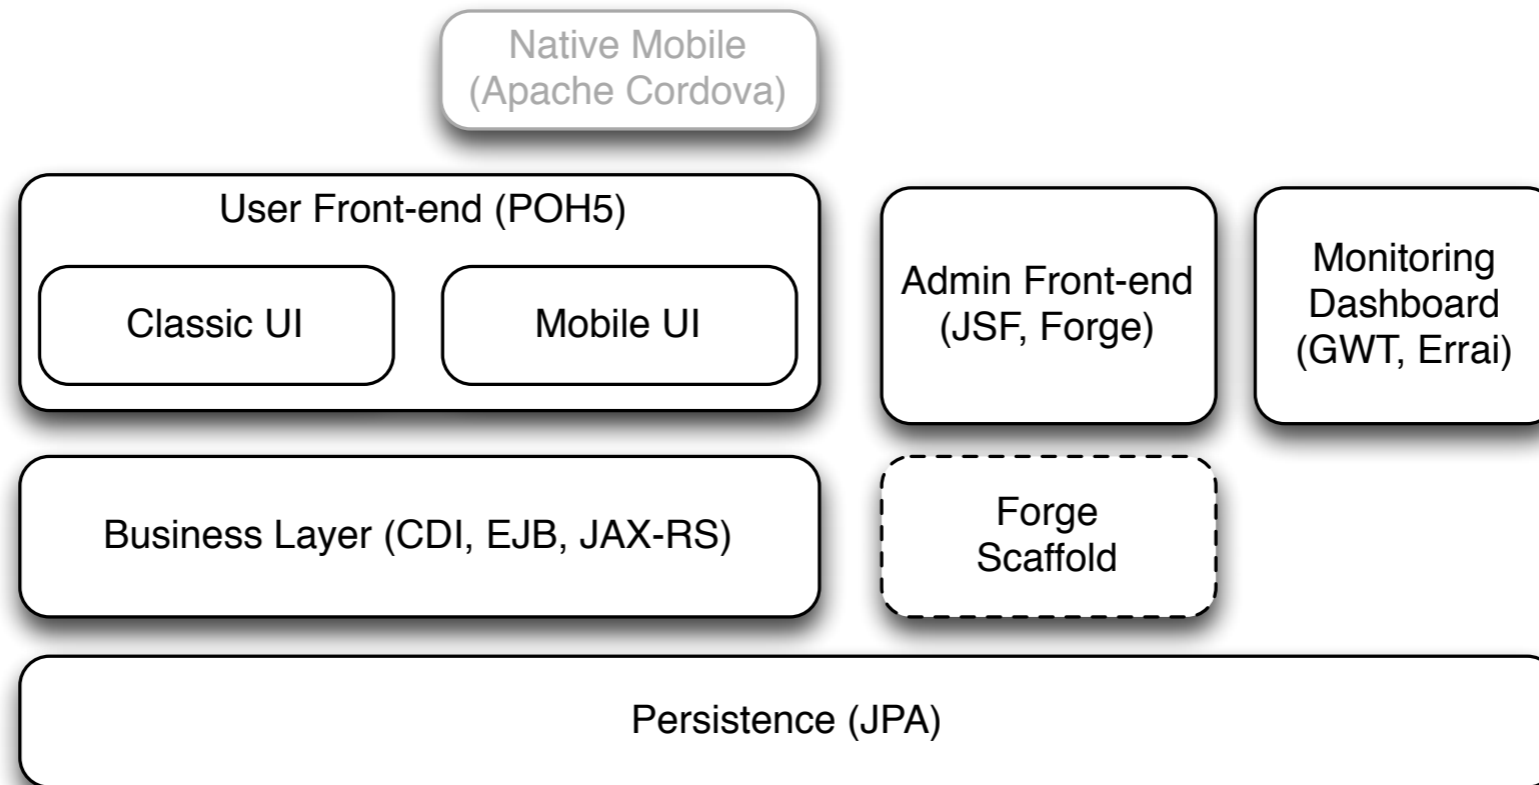

You will have seen how productive you can be with the JBoss stack.

Agenda

- Technology overview

- Application overview & demo

- Application walk through

  - Persistence layer

  - Business logic

  - JAX-RS services

  - HTML5 & JS

- RAD - generating the CRUD

Pete Muir

Architecture

Native Mobile
(Apache Cordova)

User Front-end (POH5)

Classic UI

Mobile UI

Admin Front-end
(JSF, Forge)

Monitoring
Dashboard
(GWT, Errai)

Business Layer (CDI, EJB, JAX-RS)

Forge
Scaffold

Persistence (JPA)
